KEEP TRACK OF WHAT IS VALUABLE

ASSET & FAULT MANAGEMENT

Drakewell's AM-Cloud module assists with recording, importing and managing location and attributes of all assets 'on the fly'.

A database of assets can be generated rapidly and uploaded in the field or on return to an office.

Assets can vary from a SIM card, ITS equipment, roadside cabinet or street sign and many more – the database is highly flexible.

Our Asset Management module can also be used to monitor the movement of multiple assets, log faults and report on fault resolution and plan/record routine and ad-hoc maintenance/repair activity.

FEATURES:

- > RAPID CREATION OF ASSET DATABASE
- > EFFICIENT FAULT MANAGEMENT
- > SMARTPHONE/TABLET APPS FOR FIELD USE
- > PHOTOGRAPH/DOCUMENT UPLOADS
- > MAP INTERFACES/GAZETTEER SEARCH/GIS EXPORT
- > MAINTENANCE & ROUTINE INSPECTIONS
- > FLEXIBLE TEST ROUTINES AND CHECK LISTS
- > MANY ASSET TYPES & MOVEABLE ASSETS SUPPORTED
- > PERFORMANCE MONITORING REPORTS

AM-CLOUD, KEEPING TRACK OF WHAT IS VALUABLE

DRAKEWELL & AM-CLOUD SOFTWARE

Any asset type can be easily and rapidly set up using Drakewell AM-Cloud. Powerful and scalable, our cloud based software allows the creation/amending of asset attributes no matter their type or size of inventory.

Inventory data and reports can be accessed by multiple users on many different device types, including desktop, laptop, tablet or smartphone. Data is autosynchronised for multiple users, meaning there is no need to return to the office and run backup routines.

For agencies or government bodies with staff working off site, AM-Cloud supports offline activity should an internet connection not be available.

And as Drakewell AM-Cloud is fully supported, managed and updated, you can be sure your investment will be as relevant today as it will in the future.

AM-CLOUD FEATURES:
