

Information pack

MyMobile
Workers

What does MyMobileWorkers do?

MyMobileWorkers will revolutionise the way you do work.

The platform replaces paper job packs from site and enforces a process for operatives to follow.

It has become a crucial tool for businesses within the highways space to prove safety compliance, helping successfully negate thousands of pounds worth of fines.

Reduces fines

Assures high quality work

Provides proof of work

Saves money

Specialists in the highways sector

Over 40 NHSS companies using the system daily

Who is it for?

MyMobileWorkers is adaptable for any company with a mobile workforce. Here are just a few of the industries we specialise in:

- Civil engineering
- Concrete services
- Construction
- Equipment/plant hire
- Fencing
- Ground works
- Highways
- Road maintenance
- Street lighting
- Traffic management

Why use MyMobileWorkers?

Key features for highways

- Digital risk assessments and method statements
- Forced daily site checks and stoppage reports
- Vehicle and plant safety checks with service history
- Resource planner to replace any whiteboards
- Group jobs and tasks into a project under one contract number
- Client portal to view job status in real-time

Simple to use

UK based support and development

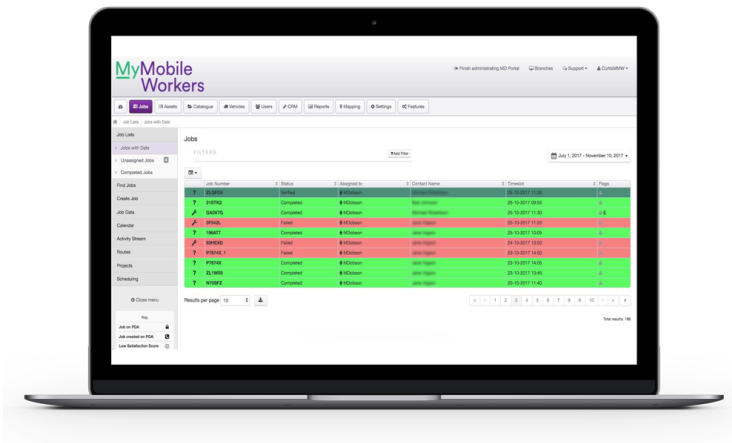

Tailored to your requirements

Regular product updates

How does it work?

The software is in 2 parts: the back office portal and the mobile app.

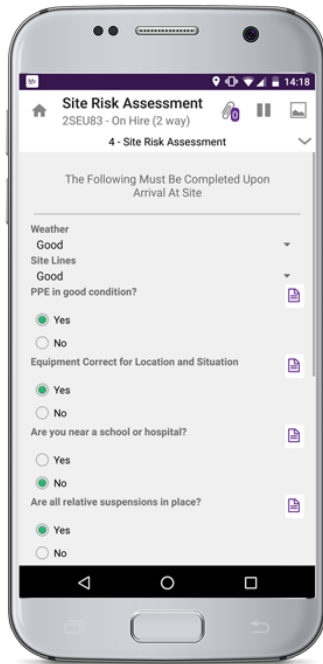

The portal

This is the main hub of information. Here, you'll be able to create jobs, plan resource and add item bundles, as well as tracking and managing your operatives and vehicles.

Once a job has been assigned to an operative (or team of operatives), it is sent to their device.

The software

The software is in 2 parts: the back office portal and the mobile app.

The app

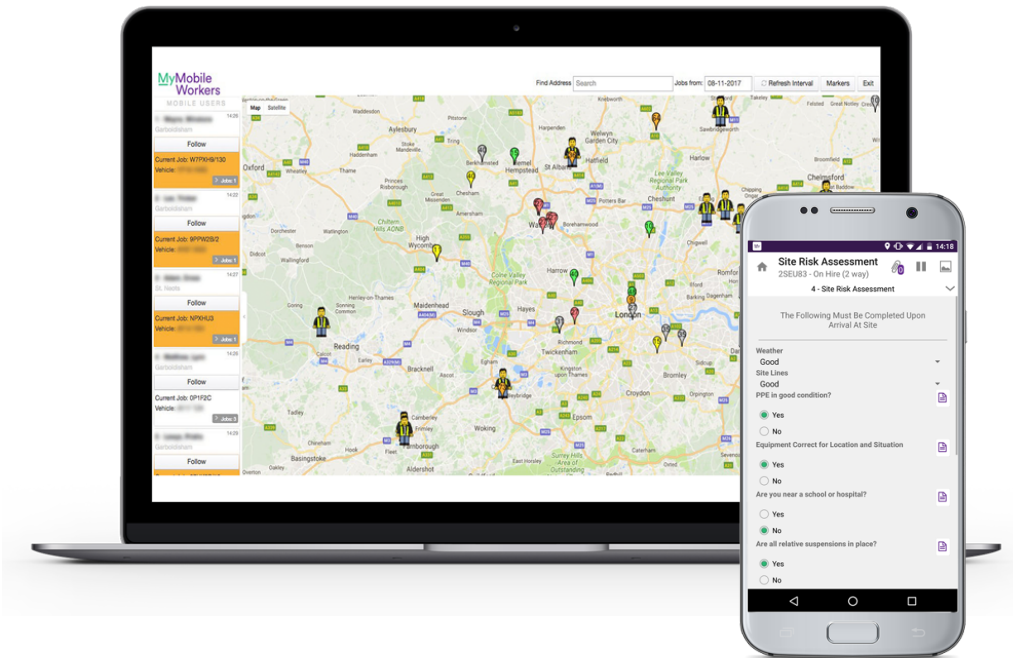

This is where operatives can access their jobs. Here, they can fill out job information including risk assessments, forms and vehicle checks.

Each job in MyMobileWorkers has a workflow: a predefined process that the operative must follow. This means that each job is held to the same high standard of safety.

This information is sent in real time to the office.

An all-in-one system

MyMobileWorkers includes a full suite of workforce management products

Products

- Mobile workforce management
- Lone worker protection
- Vehicle management
- GPS tracking
- Timesheet management
- Forms
- Quotes and invoicing
- Resource planner
- Quality control
- Asset tracking

Implementation process

✓ The process

Weekly checkpoint meetings

Every week we'll discuss how things are going, giving you the opportunity to make any changes.

Initial kick off call

Once the contract has been signed, we will have an initial kick off call to determine your needs.

Initial draft built

Using your current job sheets and input, workflows will be created and given to you for testing.

User champion testing

Choose a member to become 'user champion' and to test the workflow on actual jobs.

Test alongside paper

Introduce the rest of the team to the system, whilst retaining a paper comfort blanket (if you choose to).

Project close and handover

At this point you'll be ready to go live. A full handover is made with your dedicated account manager.

Stabilisation period

Within these 2 weeks, we'll work together any last changes to ensure the system works perfectly.

Post go-live check in

A month after going live, your account manager will call to ensure everything is well.
