WELFARE UNITS AND LIGHTING TOWERS

With the largest fleet of modern, innovative and Eco mobile units on the market, the Eco range delivers the latest in smart and unique design features to optimise onsite welfare and lighting.

As a market-leading specialist with an average fleet age of 2.5 years, we continuously invest to set a new standard for quality and service, including...

- \ 15x reduction in fuel costs and carbon emissions
- \ The latest in Hybrid Lithium and Smart Water technology
- \ Unique design and features, including larger and dynamic spaces
- \ Optimum HSE and hygiene for safe and smart wellbeing
- \ Next day national coverage with our own delivery and service teams

Take a tour of our units and see what makes our mobile welfare unique...

smart360photography.co.uk/pano/WH_Hire/Tour16Sep/

UNIQUE RETRACTABLE DRAWBAR

Our unique, retractable drawbar results in up to 40% smaller footprint once in place onsite compared to other mobile welfare units on the market. This space saving affords greater flexibility for locating onsite, as well as minimising trip hazards and potential damages with optimal HSE compliance.

40% Smaller Footprint

6 Second Instant Set Up

HSE Compliance +

20% LARGER WELFARE SPACE

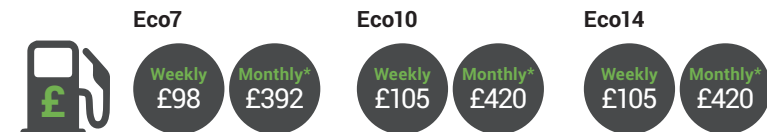

The unique smart design of our Eco units creates up to 20% greater internal space for the largest and most comfortable welfare in the market. Designed with seating and tables to optimise space for social distancing and comfort in the canteen, office and rest areas.

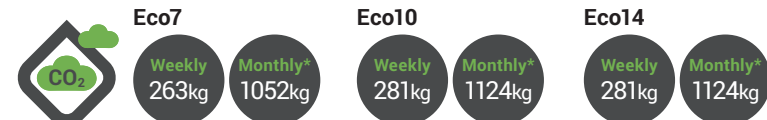

-  +20% Internal Space
-  Unique Layout & Design
-  Better Comfort

15x FUEL REDUCTION ECO HYBRID POWER

FUEL SAVINGS over standard units

CO₂ KG REDUCTION over standard units

*based on 1 week = 60 hrs and 1 month = 240 hrs @ £1/litre

SMART SERVICE SAVINGS over standard units

Using the latest in smart on-demand power generation, our Eco welfare units run silently on green battery energy for up to 75% of the time. The hybrid on-demand power technology guarantees full operation of the kitchen, welfare and office facilities without compromising on performance. Solar and modern power generation for smart recharging affords fuel savings and CO₂ reductions of up to 15x.

-  15x Fuel & CO₂ Saving
-  Smart Hybrid Technology
-  Silent Running

SMART WATER CERAMIC WC

Our unique, non-chemical water flush system recycles grey water from the washbasins and has extra-large waste tanks to optimise WC facilities. With greater capacity and longer service intervals, there is no automatic weekly service requirement, unlocking benefits in operational and service costs, as well as a reduced carbon footprint. More spacious separate cubicles with ceramic toilets and hot running water provide the highest standards in comfort and hygiene.

-  XL Smart Water WC System
-  Easy Clean Ceramic Toilet
-  HSE Compliance +

ON-DEMAND HOT RUNNING WATER

Each unit comes with at least 2 large washbasins with hot running water. Greater capacity water tanks, contactless taps and hand-to-wrist washbasins provide proper facilities for frequent handwashing and the best safety and hygiene standards.

-  Contactless Hot Water Washbasins
-  +275% More Handwashing
-  HSE Compliance +

CANTEEN FACILITIES

Large, comfortable seating and tables along with controlled heating, mains power and USB ports create a better environment for colleague wellbeing. Kitchen facilities include a high-power mains microwave and kettle, with an optional fridge to improve catering facilities.

Smart Design

HSE Compliance +

Wellbeing +

SEPARATE OFFICE IN ECO10 & X-ECO10

With a separate fully functional working office, complete with lockable drawers, mains power, heating and walk-up counter window, the Eco10 and X-Eco10 help enable on-site management. Proper administration of HSE compliance, project management and improved productivity are all supported for modern, dynamic on-site working.

Separate Office

240V Mains Power & USB

HSE Compliance +

INTEGRATED LIGHTING TOWER IN X-ECO10

Integrating tower lighting provides an unrivalled 2-in-1 solution for onsite mobile welfare and site lighting. Easily operated by remote control, the light mast has 4 x 100W LED lights independently positional with 360° and tilt positioning to tailor site lighting and optimise HSE compliance and productivity onsite with a silent battery running time of up to 9 hours.

-  Remote Controlled
-  360° Lighting
-  HSE Compliance +

DRYING AND CHANGING ROOM

With a separate drying and changing room, looking after employee wellbeing and servicing the provision of PPE helps for safe and smart working onsite. A separate heating and drying system with auto mode ensure that PPE continues to dry out after the unit is locked up, ready for the next shift.

-  Drying Room
-  Changing Room
-  HSE Compliance +

SECURE & TOUGH DESIGN

Internally lockable lifting eyes, isolated tow system and full body set down eliminates the possibility to move our Eco units. Walk-up PIR lighting, antivandal doors and windows using integral locking and sliding shutters, along with a galvanised steel housing for the entire unit ensure optimum security for our units onsite.

Antivandal

Tough

Eco7

TECHNICAL SPECIFICATION

GENERAL

- / Easy towable access & setup without requirement for HGVs or site access plans
- / Instant welfare with hydraulic 6-second kneel-down
- / Unique retractable drawbar saves up to +40% footprint and optimum non-trip HSE compliance
- / Self-sufficient hybrid power & +50% larger tank with (non-chemical) water flush WC reduces service intervals
- / 15x lower CO₂ & noise pollution from Eco system
- / Tough, galvanised steel construction
- / Antivandal integral sliding windows/shutters and doors
- / Internally lockable lifting eyes

SMART HYBRID POWER

- / 15x CO₂ reductions with Smart hybrid power management for 75% silent running and carbon savings up to 1052kg
- / 15x CO₂ reductions with Smart hybrid power management for 75% silent running and fuel savings up to £392pcm
- / High cycle AGM battery
- / Eco solar panel feed
- / Super silent 6kVA diesel engine generator
- / Low level fuel cut off & automatic recharge

CANTEEN & WELFARE ROOM

- / Up to +20% larger internal space & welfare capacity for 7 people
- / Bench seating, backrests & large tables as standard
- / Easy clean, durable stainless-steel surfaces & non-slip chequer plate flooring

- / Running hot water on demand with up to +50% larger water tank with gauge for easy service of 120 litres
- / Large stainless-steel forearm wash basin & non-touch tap
- / Welcome pack
- / First aid kit
- / Soap & paper towel dispensers
- / Fresh drinking water 10-litre container
- / High power mains microwave & kettle
- / Energy saving automatic LED lighting
- / Automatic, efficient instant heater with thermostat
- / USB & 12V charging sockets
- / Optional mains charging socket (inverter)
- / Digital battery monitor & fuel gauge for easy maintenance
- / Carbon monoxide detector & high-level vent

WC WITH UNIQUE WATER FLUSH SYSTEM

- / Unique water flush (non-chemical) ceramic toilet for optimum hygiene
- / Up to +50% larger waste tank for longer service intervals of 160L / 240 uses
- / Running hot water on demand with up to +50% larger tank & water gauge
- / Large stainless-steel forearm wash basin & non-touch tap
- / Coat hook
- / Soap & paper towel dispensers
- / Toilet roll holder
- / Easy clean, durable stainless-steel surfaces & non-slip chequer plate flooring
- / Energy saving automatic LED lighting

DRYING ROOM

- / Hanging hooks & shelving for PPE
- / Auto timer heating system
- / Energy saving automatic LED lighting
- / 5kW diesel heater & ventilation panel
- / Super silent 6kVA diesel generator with exhaust venting
- / Fuel tank access of 35L (average refuel interval 3 weeks)
- / Earth rod

Eco10

MOBILE WELFARE

The Eco10 mobile welfare unit provides modern welfare facilities, comprising a separate canteen/welfare room, drying room and WC for up to 10 people. With **20% larger** internal space, **200% more water** for contactless hot water handwashing and a unique water flush ceramic toilet, the bar is set high for our standard on smart and safe wellbeing. Silent running for up to 9 hours with hybrid power management ensures up to **15x running cost and CO₂ reductions**. Continuing with our unique design and high specification, the Eco10 has a larger canteen/welfare room plus a fully functional **separate office** complete with mains power sockets and lockable drawers. Increased capacity in space and facilities provides flexibility for more dynamic working onsite and a larger workforce of up to 10 people.

Eco14

MOBILE WELFARE

The Eco14 mobile welfare unit provides modern welfare facilities, comprising a separate canteen/welfare room, drying room and WC for up to 14 people. With **20% larger** internal space, **275% more water** for contactless hot water handwashing and a unique **water flush ceramic toilet**, the bar is set high for our standard on smart and safe wellbeing. **Silent running with hybrid power** management ensures up to **15x running cost and CO₂ reductions**. A larger welfare room with 2 separate table areas and seating for up to 14 employees creates a flexible space for canteen, office and briefing room facilities. To accommodate the greater capacity, an extra-large drying room and **2 x WC** facilities are provided. Having separate toilet cubicles and additional handwashing facilities help optimise onsite hygiene and HSE compliance with larger and more diverse workforces.

EcoXLi

MOBILE WELFARE

The EcoXLi mobile welfare unit provides modern welfare facilities, comprising a separate canteen/welfare room, 2-person office, drying facilities and 2x WCs for up to 15 people. With unlimited refills from rainwater harvesting for contactless hot water handwashing and unique water flush toilets, the bar is set high for our standard on smart and safe wellbeing. The use of renewable solar energy and next generation Lithium cell with smart auto start stop power management ensures **100% silent and clean green energy, resulting in running cost and CO₂ reductions**. Continuing with our unique design and high specification, the ECOXLi has a larger canteen/welfare room plus a fully functional separate office complete with mains power sockets. Increased capacity in space and facilities provides flexibility for more dynamic working onsite and a larger workforce of up to 15 people.

EcoXLi

TECHNICAL SPECIFICATION

GENERAL

- / Easy towable access & setup without requirement for HGVs or site access plans
- / Instant welfare with hydraulic 15-second hydraulic kneel-down
- / Self-sufficient **Lithium/Solar hybrid power**
- / XL tank with **Rainwater Harvesting** top-up with (non-chemical) water flush WC reduces service intervals
- / Minimise CO₂ & noise pollution from green running Hybrid Lithium/Solar Eco system
- / Tough, galvanised steel construction
- / Antivandal window shutters and doors
- / Separate lifting eyes
- / Fuel & Water tank accessible externally
- / Earth rod accessible from front of unit

SMART ECO HYBRID POWER

- / XXL upgraded Solar Panels for 100% renewable energy coverage
- / Next generation Lithium Hybrid technology powers 100% entire system
- / Smart Auto Start/Stop power management
- / Small 3.5kVa backup Biofuel generator
- / Smart Telemetry - user friendly power management to optimise efficiency and minimise fuel & genset usage
- / Low level fuel cut off & automatic recharge

CANTEEN & WELFARE ROOM

- / XL canteen & welfare capacity for up to **15 people**
- / Bench seating, backrests & large tables as standard
- / Easy clean, durable surfaces and flooring
- / Running hot water on demand with up to XL water tank & **rainwater harvesting** plus gauge for easy maintenance
- / Large stainless-steel forearm wash basin & non-touch tap
- / Welcome Pack
- / First Aid kit
- / Soap & paper towel dispensers

- / Fresh drinking water 20-litre container
- / High power mains microwave, kettle and fridge running **100% from battery eliminating generator use**
- / Energy saving automatic LED lighting
- / Automatic, efficient instant heater with thermostat
- / Multiple USB charging sockets
- / 240V mains charging socket
- / Digital battery monitor, water & fuel gauge for easy maintenance
- / Carbon monoxide detector & high-level vent

WC WITH UNIQUE WATER FLUSH SYSTEM

- / **2 x WC** with unique water flush (non-chemical) ceramic toilet for optimum hygiene **plus Urinal**
- / **Rainwater harvesting** to supplement longer service intervals by recycling precipitation - **unlimited WC & Sink** uses
- / XL waste tank of **340L** for longer service intervals
- / Running hot water on demand with up to +275% larger tank & water gauge
- / Large stainless-steel forearm wash basin & non-touch tap
- / Coat hook
- / Soap & paper towel dispensers
- / Toilet roll holder
- / Easy clean, durable surfaces & flooring
- / Energy saving automatic LED lighting

SMART ECO WATER

- / **Rainwater harvesting** to supplement longer service intervals by recycling precipitation
- / Recyclable grey water with a non-chemical toilet flush system
- / Unlimited grey water refill & XL 340L waste tank for longer service intervals
- / Minimise services, transport, carbon & costs
- / Smart Telemetry - **eliminate automatic weekly services**

SMART TELEMETRY

- / **Live & historical volumetric data** via dashboard for your sites and projects
- / Auto system ensures optimal green silent running from the Lithium/Solar system
- / Optimal Utilisation to ensure proper & full usage and eliminate downtime

SEPARATE OFFICE

- / 2-person XL workstation
- / 2x twin 240V mains & USB sockets
- / Counter window
- / Documents holder & notice boards
- / Antivandal shutters & door with sliding windows
- / Easy clean, durable surfaces and flooring
- / Energy saving automatic LED lighting

DRYING ROOM

- / Hanging hooks & shelving for PPE
- / Auto timer heating system

WelfareVAN

MOBILE WELFARE

With the most modern fleet of welfare vans in the market, we make the most of the latest technology and ULEZ vehicles to optimise mobile vehicle welfare. The van has seating and welfare for up to 7 people, including a separate canteen/welfare area and WC. The kitchen facilities comprise a sink with hot running water, microwave and water heater. The electric WC has a 25-litre cassette with electric flush operation. 12V & USB sockets with LED PIR lighting come as standard.

7-person

Electric Flush WC

2 x Hot Water Washbasins

Canteen /
Welfare Room

VOSA and ULEZ
Compliant

WelfareVAN

TECHNICAL SPECIFICATION

VEHICLE

- / Modern ULEZ compliant vehicle
- / Full chapter 8 & speed limiter livery
- / Smart onboard power management
- / Cabin heater & energy saving automatic LED lighting

CANTEEN & WELFARE ROOM

- / Larger cabin with seating & table for 4 people
- / USB & 12V charging sockets
- / Durable, non-slip flooring & vinyl seating
- / Hot running water sink
- / Water heater with 700W 2.8 litre water boiler
- / Microwave
- / First aid kit
- / Fire extinguisher
- / Soap & paper towel dispensers
- / Fresh drinking water 10-litre container
- / Energy saving automatic LED lighting
- / Heater with thermostat

WC & CHANGING AREA

- / Separate WC & changing area to rear of vehicle
- / Larger design space with storage
- / 25-litre electric cassette with electric flush operation
- / Separate handwashing basin with soap & paper towel dispenser
- / Coat hook
- / Soap & paper towel dispensers
- / Toilet roll holder
- / Easy clean, durable surfaces
- / Energy saving automatic LED lighting

X-EcoLED

MOBILE TOWER LIGHTING

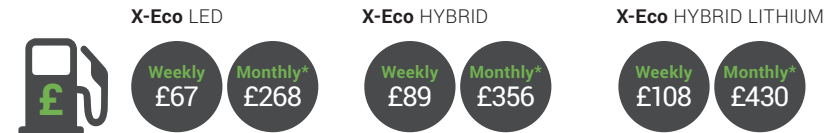

This X-EcoLED mobile lighting tower is easy to transport and locate, providing instant lighting for an area equivalent to half a football pitch. The easily operated extendable 8.5m hydraulic light mast has **6 x 150W LED lights** with full 360° positioning to tailor site lighting and optimise onsite HSE compliance and productivity. With an **Automatic Dusk-Dawn sensor**, the efficient 3kVa generator has a fuel efficiency of 0.55l/hour, providing lighting for up to **200 hours** between refuel intervals up to **73% saving in fuel and CO₂ emissions**.

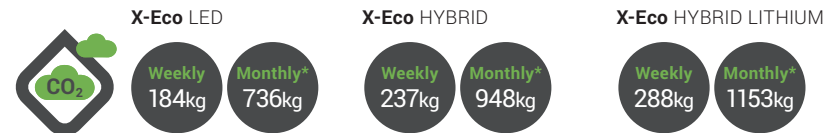

15x FUEL REDUCTION

ECO HYBRID POWER

FUEL SAVINGS over standard units

CO₂ KG REDUCTION over standard units

*based on 1 week = 60 hrs and 1 month = 240 hrs @ £1/litre

Quick & Easy Site Access & Setup

200 Hours Continuous Light per Refill

6 x 150W LED for 3,800m² Lighting

73% CO₂ Reduction

X-EcoLED

TECHNICAL SPECIFICATION

GENERAL

- / Easy towable access & setup without requirement for HGVs or site access plans
- / Instant lighting with quick setup
- / Automatic hydraulic mast system
- / Electrical safety & overload protection
- / Fully homologated axle, towing hitch & road tow trailer
- / Tough, galvanised steel construction
- / Side stabilisers
- / Central lifting eye & forklift pockets

LIGHTING

- / Up to +20% greater light coverage vs std units
- / 6 x 150W LED high efficiency LED floodlights
- / 3800 working light coverage-Illumination to 5 lux (m²)
- / Auto Dusk-Dawn light sensor
- / Safety hydraulic extendable mast
- / AMOSS auto lowering system
- / 360° rotation
- / Independently operable lights
- / Independently positionable lights

SMART HYBRID POWER

- / 73% CO₂ saving vs std units
- / 71% fuel saving vs std units
- / 0.336 CO₂ emissions per month (kg)
- / £132 fuel costs per month
- / Super efficient 3.5kVa diesel engine generator
- / Low level fuel cut off & automatic recharge
- / 65 up to +10% quieter engine (dBA at 7 metres)
- / 110 litres fuel tank capacity
- / 0.55 litres/hours fuel consumption
- / 200 hours refuel interval
- / 182 hours run time per 100 litres of fuel

X-EcoHYBRID

MOBILE TOWER LIGHTING

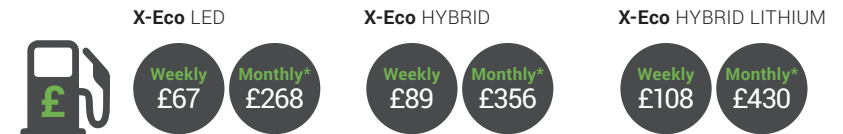

The X-EcoHYBRID mobile lighting tower uses high-cycle AGM battery technology with generated power management to provide a longer operating time of **11-18 hours of silent green running** on batteries, perfect for sites with restrictions on noise pollution. The **programmable smart hybrid** power efficiency provides a fuel consumption equivalent to 0.23l/hour, with total run time of 965 hours before refuelling and **fuel and CO₂ emissions savings of 88%**.

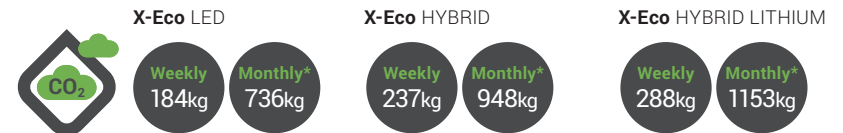

15x FUEL REDUCTION

ECO HYBRID POWER

FUEL SAVINGS over standard units

CO₂ KG REDUCTION over standard units

*based on 1 week = 60 hrs and 1 month = 240 hrs @ £1/litre

- Quick & Easy Site Access & Setup
- 965 Hours Continuous Light per Refill
- 6 x 150W LED for 3,800m² Lighting
- Hybrid Battery Power
- 88% CO₂ Reduction
- 58% Silent Green Running Time

X-EcoHYBRID

TECHNICAL SPECIFICATION

- / High cycle AGM battery
- / Super efficient 3.5kVa diesel engine generator
- / Low level fuel cut off & automatic recharge
- / Silent running
- / 58% silent green running vs generator per cycle
- / 11-18 hours silent running cycle
- / 8-hour recharge cycle
- / 0-65 up to +10% quieter engine (dBA at 7 metres)
- / 222 litres fuel tank capacity
- / 0.23 litres/hours fuel consumption
- / 965 hours refuel interval
- / 435 hours run time per 100 litres of fuel

X-EcoHYBRIDLITHIUM

MOBILE TOWER LIGHTING

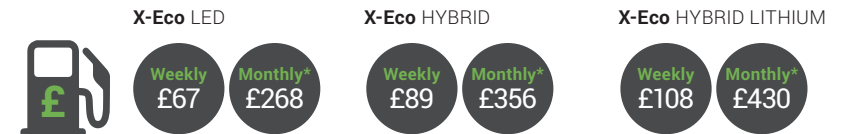

The X-EcoHYBRIDLITHIUM mobile lighting tower is an **industry first** in the latest **Lithium hybrid technology** and the most ecologically sustainable on the market without compromising on lighting safety and performance. **Smart telematics** comes as standard, including **remote operating** and monitoring to optimise flexibility and productivity. The 8.5m high **6 x 100W LED** provides illumination for up to half a football pitch with a **guaranteed silent running of 11.5-36 hours** and a **3-hour rapid recharge**. With total run time of **455 hours** before refuelling and an average fuel consumption of 0.11l/hour, the Lithium Hybrid offers the most Eco solution in the market with a **94% reduction in fuel and CO₂ emissions**.
