

# /// SentriGate

## AN INSTANT SOLUTION TO TRAFFIC CONTROL

A solar powered, mobile gate designed for traffic control with ease of use in mind.

- The lightweight, wireless Sentrigate can be easily relocated thanks to the wheels on its base.
- The SentriGate also comes with remote access key-fobs, that can open the gates from up to 50m away.
- Range can be increased to 150m when operated with a long range fob.
- Each Sentrigate arm is 3m long, and can pair with another SentriGate to cover an area of 6m.

### SentriGate includes:

Remote control fobs, wheels & weights, maintenance pack, solar panels and battery.

#### QUICK SETUP

2 GATES SET UP  
IN UNDER  
3 MINUTES

#### LONG RANGE

REMOTE CONTROL  
KEY FOBs WITH  
50M OF RANGE

#### EASY INSTALL

REQUIRES ONLY  
1 PERSON TO  
SET UP

## WHERE SENTRIGATE IS BEING USED TODAY

- **Construction sites** – Controlling access onto site
- **Demolition and land reclamation sites** – Controlling access onto site
- **Waste recycling sites** – Loader driver controls access into his working area
- **Distribution facilities** – Preventing access onto loading areas
- **Weighbridges** – To control entry and speed of entry
