

Orchestrating the Commuter Journey

Bizie, a provider of innovative micro-payment solutions, launches the new Bizie Commuter mobile app platform

- Enables frictionless commuter journeys with easy access to the Bizie marketplace to buy tickets, services & products while travelling.
- The Bizie app is available for IOS, Android & browsers. Merchant terminals facilitate end-to-end solutions including order acceptance, ePOS and kiosks, with payment integration.
- Real-time integration to National Rail timetable for train updates. Automatic adjustment of time-based orders linked to journey times.
- Push notifications keep customers constantly updated during the entire journey.
- Supports service provider appointment booking & F&B or retailer click-and-collect, with all orders and receipts in one app.

- **Frictionless commuting**...streamlined & multi-functional marketplace access creates a unique customer experience : **automating the new era of commuting**;
- **Maximize revenue opportunities**push marketing to customers highlights services and products at a single transport hub: **Bizie can support extra services such as prepaid parking, EV charging, & additional services relevant to the commuting day**;
- **Promote new services & products**new marketplace offerings are **easy to create and promote**, with an ability to target ads and/or vouchers to specific commuter groups, time of day, location;
- **Automation & live information flow improves operations**....Real-time and historical data on commuter movements and purchases **opens a window across commuter activity** by operator, merchants and customers for predictive data analysis;
- **Same simple app can be used as Bizie branded or white-label version**....creates ability to on-board operators & merchants very quickly, **improves operator & merchant experience** through common procedures and marketing platform.

About Bizie

With many years of software integration and development expertise gained in the most demanding high throughput industry verticals, Bizie specialises in ensuring that businesses have the technology platforms that will enable them to scale up their operations, creating significant increases in customer orders and satisfaction.
