## BOILER CLEANER

from  
**NAVIGATOR®**

PRODUCT CODE

BFMBC-BLU22

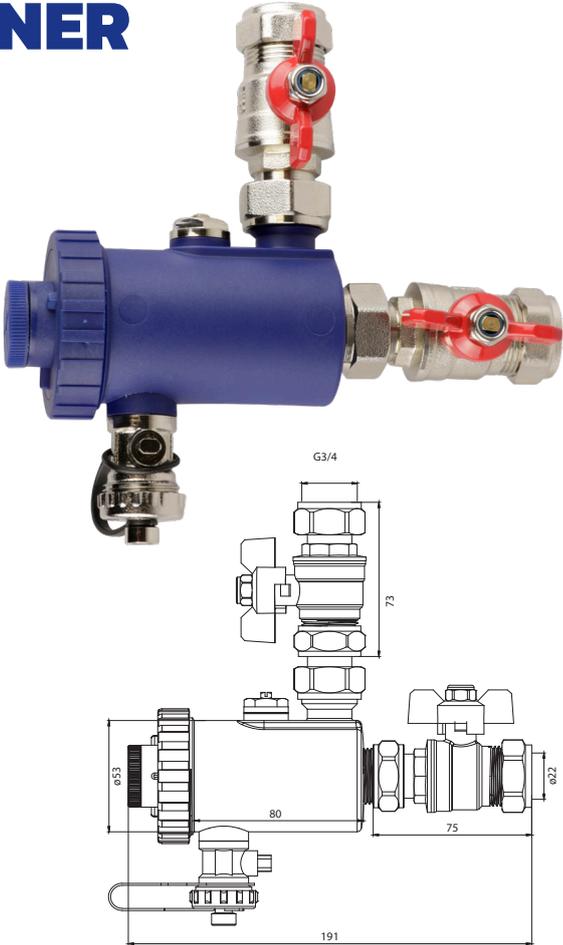

- WRAS approved magnetic filter removes ferrous & non-ferrous contamination
- Promotes a more efficient heating system and helps prevent boiler damage
- Premium quality CW617N brass full bore valves manufactured to EN 1254-2
- High strength magnetic system tested to 12000 gauss
- Seals are heat resistant to 150°C
- Specially designed blue case made from virgin polymer – no recycled content
- No quibble 3-year warranty from a trusted UK supplier
- Complete fitting kit included with free multi-tool & spare seals
- Easy access for maintenance, with free drain off adaptor included
- Can be installed horizontally, vertically or at 45 degrees
- Suitable for flow rates up to 15 litres / min @ 1kPa
- Installation instructions & service record label included
- Online video for installation & maintenance: <https://navigatormsl.com/magblu>

# MAGBLU MINI

## BOILER CLEANER

Magblu Mini is a compact version of our established Magblu magnetic filter family. Boasting a high powered 10,000 gauss rated magnetic array, the mini is an effective solution to ferrite particles circulating within smaller heating systems up to 14 litres/kw capacity.

No compromises have been made regarding quality of components, with full bore valves, boiler quality seals and a specially designed polymeric case.
