

Survey & Safety

Technical Support and Service

SURVEY & SAFETY

GAP Survey and Safety customers are fully supported both in the office and on site by our Technical Support team of Geospatial specialists.

Whether your project involves construction, utilities, mapping, remote sensing and more, we've got you covered.

To ensure that our fleet of instruments are maintained to the highest standards, our accredited workshops and survey technicians are on hand to carry out servicing, repairs and calibration. With extensive knowledge and specialist support within the survey industry, we aim to increase cost effectiveness whilst maintaining the highest of standards in quality and service.
