

PERMANENT BRIDGING

ACROW

“Acrow bridges are built to last. Assembled in days or weeks, our durable solutions offer a service life of up to 100 years, utilizing high-strength, prefabricated modular components.”

William Killeen, Acrow CEO

BUILT TO LAST

Virtually maintenance free, our steel bridges are built to last 100 years. Longevity, increased capacity and significant cost savings are the hallmarks of Acrow's bridging solutions. Our bridges offer superior performance with a proprietary blend of high-strength U.S. steel and a galvanizing process that eliminates corrosion. With modular components offering ease of assembly and rapid mobilization, Acrow connects you to permanent, cost-effective infrastructure.

APPLICATIONS

Vehicular
Long Span
Beam
Pedestrian
Railroad

BENEFITS

Prefabricated bridge elements
High strength, sustainable steel
made in USA
Accelerated Bridge Construction
Ease of assembly

COMPREHENSIVE SERVICE

Acrow guides you through the entire process from planning, design and engineering, all the way through commissioning of the bridge. We are committed to service excellence throughout the entire bridge-building experience.

ACROW CONNECTS YOU TO PERMANENT, COST-EFFECTIVE INFRASTRUCTURE

Acrow specializes in the design and manufacture of modular steel bridging. We engineer our versatile, prefabricated components for both permanent bridges and rapid response applications such as detour, military and emergency bridging. Our comprehensive service guides you throughout the process. From design through final commissioning, **Acrow connects you to the right solution.**

INSTALLATION METHODS

Cantilevered Launch: Rolled into place without use of a crane
Crane Assisted Launch: Requires less counterweight than a conventional launch
Crane Lift In: When time and speed are most critical
