The perfect solution for:

Domestic Homes
Apartments
Small Businesses
Schools

Utilising a modern, sleek cubic design the Nanto Plus provides a luxurious black and white monochrome finish. This space saving shape also offers complete versatility when it comes to installation, whether placed under or above the bathroom and kitchen sink.

Inside there is a diamond quality enamel glass tank which incorporates a magnesium anode increasing the lifespan by up to 50%. It has a copper heating element which is submerged within the tank offering extremely fast reheat times and is insulated using high density CFC free polyurethane foam to achieve an ErP rating A.

The Nanto Plus features a digital control panel on the front offering the user complete control and allows the user to adjust the unit's water temperature or switch between eco, vacation, and boost modes.

Eco mode sets the water temperature to an energy efficient 55°C whilst vacation mode will drop the water heater's temperature to 7°C, reducing the energy consumption and running costs. If extra hot water is required the user can activate boost mode to increase the volume of hot water produced to sustain the high demand at any given time.

ErP Rating: A
