

4D VISION: TAKE A LOOK AT THE BIGGER PICTURE WITH US

Freyssinet offers a 4D service for the proactive rehabilitation and safeguarding of structures.

Comprehensive, customised solutions for ensuring performance, longevity and safety for new and existing structures.

Want to know more? Freyssinet's **Technical Sessions** have been developed to introduce you to innovative techniques, products and materials, supporting your asset management journey at every stage.

1D: DETERMINE

Structural health assessment, using survey, inspection and testing methods to determine the current health status of the structure.

2D: DEVELOP

Collaborating with asset owners to devise a strategic scheme plan to ensure the structures safety and longevity.

3D: DESIGN

Bespoke technical solutions that combine experience and innovation, from propping and jacking to temporary works design and bearing replacement.

4D: DELIVER

Consolidated management and execution of a project, focused on client's needs and utilising information gathered at each stage.

TECHNICAL CPD SESSIONS

Freyssinet's Technical Sessions focus on the latest innovations, capabilities and experiences in the new build and structural repairs industry.

Sessions are delivered in-person or online at a time and location to suit you.

The series includes:

- **Box sliding and heavy lifting**
- **Structural surveys and inspection**
- **UHPFRC solutions**
- **Bridge construction methodologies**
- **Bearings, expansion joints and Freyssicare solutions**
- **Structural repair techniques**
- **Post-tensioning in repairs & strengthening**
- **Concrete Repair – defect repairs and protection**
