Asset Management

- Detect
- Diagnose
- Develop
- Deliver

We offer a professional service from project inception through to the delivery of the final solution.

Our engineering and operational teams undertake survey, inspection and testing services to gather data on the condition of structures, and we work with asset owners and designers to determine and develop repair, strengthening, protection and maintenance solutions.

- Visual Condition Inspections & NDT (inc Low Cover/GPR/Ultrasonics)
- Bearing Inspections
- Delamination Surveys
- Post Tensioning Special Inspections
- Crack Surveys & Monitoring
- Materials Sampling
- Depth of Carbonation & Chemical Analysis
- Half Cell Potential Mapping
- Resistivity Testing
