

Balvac
Balfour Beatty

Early Engagement

Often referred to as **Early Contractor Involvement (ECI)**. This has been our proven way of adding value and reducing risk for our customers for many years.

By engaging Balvac early in the project design and development stage, we can provide innovation and technical excellence, drawing on our many years of experience of structural repair, strengthening, protection and refurbishment work across Transport, Energy & Power sectors.

Our qualified engineering and pre construction teams will focus on the Technical Lifecycle of a project to work collaboratively with customers and designers.

- Survey & Inspection
- Constructability Review
- Method & Product Selection
- Design Approval & Temporary Works Management
- Technical Standards Compliance
