

## Discover Mobile Coverage

Streetwave is the market leader in providing independent mobile coverage surveys and analysis.

Our clients quickly understand how poor mobile coverage is affecting their employees and residents when Streetwave measures the mobile signal quality across every house and business in their council.

### Benefits

#### Enhance Telephony Procurement

Improve productivity by choosing the best mobile network to procure for your council employees to use

#### Inform Infrastructure Deployments

Highlight the locations most in need of coverage improvements and benchmark the success of new mast deployments

#### Empower Residents & Businesses

Tackle digital exclusion by informing residents and businesses which mobile network is the best at their locations

### Why Streetwave?

Streetwave's data is ground-breaking in detail. Our pioneering software and reports make it easy for everyone to understand how mobile connectivity is affecting your council's economy.

When analysing the big 4 mobile networks (EE, Vodafone, O2 and Three) across your road network – Streetwave analyses:

1. What network speeds are available?
2. What are the best networks to use?
3. How many coverage 'not-spots' are there?
4. Where is 5G being rolled out?
