

Gul-e by ODS is the simplest, fastest, solution to on-street EV charging

Designed for Local Authorities, by a Local Authority Highways team, Gul-e helps forward-thinking planners and developers achieve sustainability targets, generate revenue, and plan for an electric future.

No driveway? No problem!

Gul-e enables EV adoption in areas without driveways.

Our safe, simple, and hardwearing channel blends into the pavement - just like any drainage or other pavement installation.

By your side throughout the entire process. Your dedicated account manager will support you every step of the way

Local Authority owned, so we truly understand your pressures and priorities

Reduces capital expenditure for on-street infrastructure

Developed alongside a Local Authority Highways Authority

Independently, rigorously lab tested over several years, achieving BS EN 1433 compliance

Gul-e will help your communities to safely and conveniently transition to EV ownership - even without access to off-street parking.

Fast installation on all pavement types.

No moving parts to break or maintain.

Low cost, encourages overnight charging and reduces network grid pressures.

Tool-free operation for convenience and inclusivity.

“The best thing about Gul-e is its simplicity. It really is so easy to use, and was a big part of my decision to buy an EV.”
Jesper Ekelund, Oxford

With Gul-e, forward-thinking Local Authorities can achieve sustainability targets and plan for an electric future.

Gul-e's parent company, ODS, is wholly owned by Oxford City Council, and held to the highest standards of accountability and compliance.

100% of ODS's profits are reinvested back into the Council to support its communities.

The ODS infrastructure team is the valued and trusted civil engineering partner for thousands of businesses around the country. It has responsibility for maintaining 267 miles of streets and towpaths in Oxford, as well as providing comprehensive commercial highways services - from installations and repairs, to landscaping and inspections.

With our knowledge and expertise, our team will be by your side every step of the way.
