

Streamline BNG compliance with BNGAI™

Accelerated BNG application review and fast validation

High-risk application flagging and monitoring

Satellite-powered land analysis for off-site credits

Validate BNG applications, support local biodiversity, and create off-site credits with BNGAI™

BNGAI™ is an end-to-end platform designed to simplify biodiversity net gain compliance for local planning authorities.

From high application volumes to improving local nature recovery, BNGAI™ automates your workflow, supports habitat creation, and helps create biodiversity credits for off-site gains.

Review & validate with confidence

Streamline biodiversity plan reviews, validate compliance, and identify high-risk applications needing further inspection.

Develop local nature recovery plans

Automate habitat assessments to develop local nature recovery strategies and support the species' ecosystem.

Create and manage biodiversity credits

Identify habitat bank sites, create BNG credits and facilitate unit transactions. Manage and enhance ecosystems while ensuring compliance.

✓ TRUSTED BY LOCAL COUNCILS AND LARGEST DEVELOPERS

How BNGAI™ helps local governments

BNGAI™ leverages AI and satellite imagery to enable councils and planning authorities to efficiently manage biodiversity compliance, speed up application reviews and ensuring accuracy in every step.

With tools for local biodiversity recovery, habitat banking, and real-time monitoring, BNGAI™ helps you manage high application volumes, improve BNG around road networks, and promote ecosystem health in your region.

Simplify compliance with AI
and streamline BNG plan validation

Identify high-risk projects
and prioritise site visits and detailed reviews

Create local biodiversity plans
with wide-scale habitat assessments

Unlock the land's potential
through ecosystem enhancement
