MyMobileWorkers
BY ASOLVI

Manage your field staff with confidence.

Simplify compliance, streamline operations, and stay competitive with MyMobileWorkers.

Save Time & Money

Streamline operations, improve job planning for greater efficiency & fewer errors, reduce paperwork, and prevent damage claims.

Impress Your Customers & Win More Jobs

Gain a competitive edge by providing your customers with real-time updates, job tracking, safety record and more.

Make Informed Decisions in Real-Time

Access real-time information, detect problems early, and gain insights into job and team performance.

Enforce Health & Safety

Ensure compliance and protect your workers with enforced digital workflows and secure documentation.

How it works

1

Job Planning

Office staff create digital job sheets with all job info (location, tasks, materials, safety protocols) and assign them to field workers via the app.

2

Job Completion

Field workers get jobs on their smart device, complete tasks while following safety guidelines, and document work for proof of service and compliance.

3

Quality Assurance, Invoicing & Payment

After job completion, office staff verify the work on the MMW platform, generate an invoice, and send it to the client for payment.

"In using MyMobileWorkers, all managers and planners have knowledge of current and future workload throughout all depots."

John MacDonald
Managing Director, Contraflow

"The resource planner has benefitted us greatly... It's invaluable to our operations."

Simon Chadwick
Managing Director, Direct Traffic Management

Industries we serve

MyMobileWorkers is fully customised to meet your specific business needs. We work closely with you to review your existing forms and workflows, digitising them to streamline your operations and improve efficiency. We have decades of experience serving a wide range of industries, including:

 **Roads & Highways**
Manage roadwork permits, track asset maintenance, and improve response times.

 **Civils**
Streamline project management with real-time tracking of site activities, resources, and compliance with regulations

 **Construction**
.Automate task scheduling, resource allocation, and communication between on-site teams and office staff.

 **Traffic Management**
Manage site equipment, enforce safety workflows and get instant updates on traffic control plans

 **Facilities & Property Maintenance**
Schedule routine maintenance, streamline vendor management, track work orders, and improve tenant satisfaction.

 **Rail**
Streamline track maintenance, manage inspections, and improve incident reporting

Features

 **Resource Planner**
Assign technicians based on location, skillset, and availability directly within the platform.

 **Digital Job Sheets**
Quickly capture all essential job details in one central location, accessible by all authorised staff.

 **Asset Tracking**
Never lose track of your equipment. Track the location, history, user, and condition of your assets.

 **Real-Time Alerts**
Receive instant notifications for critical issues that need immediate action.

 **Customer Portal**
Give clients instant access to job information, including quotes, invoices, and real-time updates.

 **Near Miss Reporting**
Easily report and analyse near-miss incidents to prevent future accidents.
