

TEMPORARY CCTV

We offer temporary access control solutions to keep sites safe and secure.

Combining a traditional cabled CCTV system with advanced AI technology gives maximum coverage and protection for your site. You can watch the high definition cameras from a local monitor giving you full site visibility, with the peace of mind we will monitor your site when you're not there.

Key Features

HD Cameras

High definition cameras with 24hour recording

AI (Artificial Intelligence)

Advanced AI detection to filter out false alarms

Full 4G Connectivity

4G internet with a mobile app for live view and playback

Audio Announcements

Loud speaker to deter intruders

Deter. Detect. Challenge. Respond.

1

Deter

Highly Visual Posts

Bright yellow posts can be installed to provide an ideal view of site and to inform intruders that your site is well protected.

Highly Visual Signage

Displayed around your site to inform intruders the site is protected. Fully GDPR compliant.

2

Detect

High Definition Cameras

HD cameras with night vision are positioned around your site on yellow posts or installed on fences, buildings, or site cabins.

Virtual Tripwire Lines

Detection lines within your site boundaries will trigger an alarm if crossed by any person or vehicle.

AI (Artificial Intelligence)

The CCTV cameras use AI to only detect humans or vehicles. False alarms such as animals and foliage are filtered out.

3

Alarm

Monitoring Station

Alarms are reviewed by a 24 hour NSI Gold 3rd party monitoring station

Keyholders Contacted

When alarms are reviewed, if someone is seen, your keyholders will be contacted to verify if it's an authorised person.

Audio Challenge

The monitoring station will use the loudspeaker to challenge the intruder, informing them that the police have been called.

4

Respond

Security / Police Response

The police or we can arrange a local security guard to respond to criminal activity.

Incident Report

For any intrusions, an email with the images will be sent with a full incident report.

Options for Power

Mains, generator or solar powered
(3-4 day battery backup)

RAPID DEPLOYMENT MOBILE CCTV TOWER

We offer temporary access control solutions to keep sites safe and secure.

Combining a traditional cabled CCTV system with advanced AI technology gives maximum coverage and protection for your site. You can watch the high definition cameras from a local monitor giving you full site visibility, with the peace of mind we will monitor your site when you're not there.

Key Features

HD Cameras

4 x HD cameras (360 degree view) with 24hour recording

24/7 Monitored Alarms

Full monitoring of alarms by our monitoring station

Audio Announcements

Loud speaker to deter intruders

Full 4G Connectivity

4G internet with a mobile app for live view and playback

Deter. Detect. Challenge. Respond.

1

Deter

Highly Visual Posts

Tower has fluorescent yellow police-like colours and a mast that extends up to 6m high.

Highly Visual Signage

Displayed around your site to inform intruders the site is protected. Fully GDPR compliant.

2

Detect

High Definition Cameras

Four HD cameras provide a 360-degree view of your site. An optional zoomable camera offers extended range and visibility.

Virtual Tripwire Lines

Detection lines within your site boundaries will trigger an alarm if crossed by any person or vehicle.

AI (Artificial Intelligence)

The system uses AI to only detect humans or vehicles. False alarms such as animals and foliage are dismissed.

3

Alarm

Monitoring Station

Alarms are reviewed by a 24 hour NSI Gold 3rd party monitoring station

Keyholders Contacted

When alarms are reviewed, if someone is seen, your keyholders will be contacted to verify if it's an authorised person.

Audio Challenge

The monitoring station will use the loudspeaker to challenge the intruder, informing them that the police have been called.

4

Respond

Security / Police Response

The police or we can arrange a local security guard to respond to criminal activity.

Incident Report

For any intrusions, an email with the images will be sent with a full incident report.

Battery Powered

Powered by batteries for up to a year

WIRELESS CCTV & ALARMS

We offer temporary access control solutions to keep sites safe and secure.

Combining a traditional cabled CCTV system with advanced AI technology gives maximum coverage and protection for your site. You can watch the high definition cameras from a local monitor giving you full site visibility, with the peace of mind we will monitor your site when you're not there.

Key Features

AI (Artificial Intelligence)

Advanced AI detection to filter out false alarms

24/7 Monitored Alarms

Full monitoring of alarms by our monitoring station

Sirens

Loud sirens to automatically deter intruders

Full 4G Connectivity

4G internet with a mobile app for live view and playback

Deter. Detect. Challenge. Respond.

1

Deter

Highly Visual Posts

Bright yellow posts can be installed to provide an ideal view of site and to inform intruders that your site is well protected.

Highly Visual Signage

Displayed around your site to inform intruders the site is protected. Fully GDPR compliant.

2

Detect

Motion Activated Detectors

The detectors use motion detection PIR sensors with a combined camera which takes HD snapshots for as long as there is movement in front of them.

AI (Artificial Intelligence)

All images are sent to the cloud to be analysed by an advanced AI algorithm. False alarms such as animals and foliage are dismissed.

3

Alarm

Monitoring Station

Alarms are reviewed by a 24 hour NSI Gold 3rd party monitoring station

Keyholders Contacted

When alarms are reviewed, if someone is seen, your keyholders will be contacted to verify if it's an authorised person.

Audio Challenge

Online Portal

Track your project's progress anytime with up-to-the-minute images and comparisons on our online portal.

CONSTRUCTION SITE TIMELAPSE

Record the whole duration of your project with a panoramic high-definition camera. Showcase your full project into a few minutes with your chosen music and your own branding. Follow the evolution of your project with up to the minute images available through our secure online portal.

Key Features

4-6K Resolution

The high definition can capture for a true panoramic timelapse video

Built in 4G

No on-site internet or wifi is required

Solar Power

Completely solar powered (or 12v power option)

Backup

Secure cloud image backup

Compact Design

Cable-free design means it can be mounted virtually anywhere

Versatility

Ideal for construction, demolition or events
