# Magic Notes

Powered by **beam**

AI-powered instant and customised summaries of your frontline sessions

1

Tap record

We'll automatically detect different speakers and transcribe your conversation.

2

Get your one-click case note

Magic Notes will summarise and pull out important details and actions according to your team's needs. Check the note is accurate before adding it directly to your database.

Magic Notes is an app built by Beam that records and transcribes social work sessions before providing a custom assessment or 'case note ready' summary.

Saves a day a week
Liberate caseworkers from 8 hours of admin a week when you use Magic Notes

Bespoke summaries
Categorised based on your use case, such as using the Care Act Assessments headings, along with automatically capturing actions.

Easy to integrate
Integrate into your existing systems with one-click copy to Liquid Logic, Mosaic, or whichever database the team uses

Improve retention
Quality of case notes improve and staff spend more time doing what they love - supporting people

Gold standard data protection
All data stored securely and processed in the UK, compliant with ICO guidelines and GDPR
