

We deliver the safest solutions for working over water on Rail and Highways projects all across the UK.

If your next job is over water, get in touch and make sure you too are working with the best.

Access Solution

Pontoon provides access for your rail and highway challenges over water.

- ◆ Maintenance and repairs
- ◆ Extra workspace and welfare
- ◆ Structural sampling
- ◆ De-vegetation
- ◆ Transport barges
- ◆ Fall arrest
- ◆ Scour protection
- ◆ Scaffolding up
- ◆ Bridge Inspection
- ◆ Painting
- ◆ Construction

Floating scaffold

Pontoons facilitate access to the underside of bridges for inspection and repair without the need of decommissioning or possession orders. Floating scaffold bridge inspections are made simpler and allow for multiple inspections on the same waterway. Access your worksite in the quickest and safest way possible.

Setting the standards

Our team of installers are employed full time by Pontoonworks and benefit from the best external and internal training. We have the UK's most qualified teams, all with **CSCS Skilled Worker** qualification, the only personnel trained to that level. Our customers are reassured they will receive the best and as such each team has a SSSTS supervisor on site during install.

Innovation

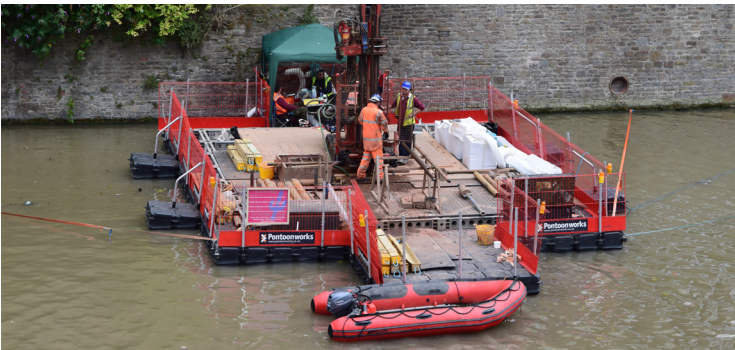

We can secure scaffold to the decks of our pontoon using a unique internal pin providing the safest working environment.

Our innovative Spud Leg System can be used to anchor the platform in place for projects that require this level of stability or precise positioning.

All our installations are designed with our exclusive stability software to provide our clients with a detailed assurance of stability.

Working platforms

We provide floating work platforms for bridge construction. In addition to mobile drilling rig platforms for the initial site survey geotechnical work, modular materials transport barges are invaluable for getting equipment, personnel and plant to site where access is an issue.

Walkways and Welfare

We deliver access for both pedestrian walkways, as well as for your onsite works teams and these can also include floating welfare facilities.

Get in touch and we can demonstrate why it is time to change your approach
