

JADU CENTRAL GATEWAY

Connecting communities

with an all inclusive Intranet

UNLOCK THE POWER OF SECURE INTRANET ACCESS WITH JADU GATEWAY.

Jadu Central Gateway is an intranet solution for large organisations that want to provide all of their teams, employees and partners with secure access to important information, documentation and forms.

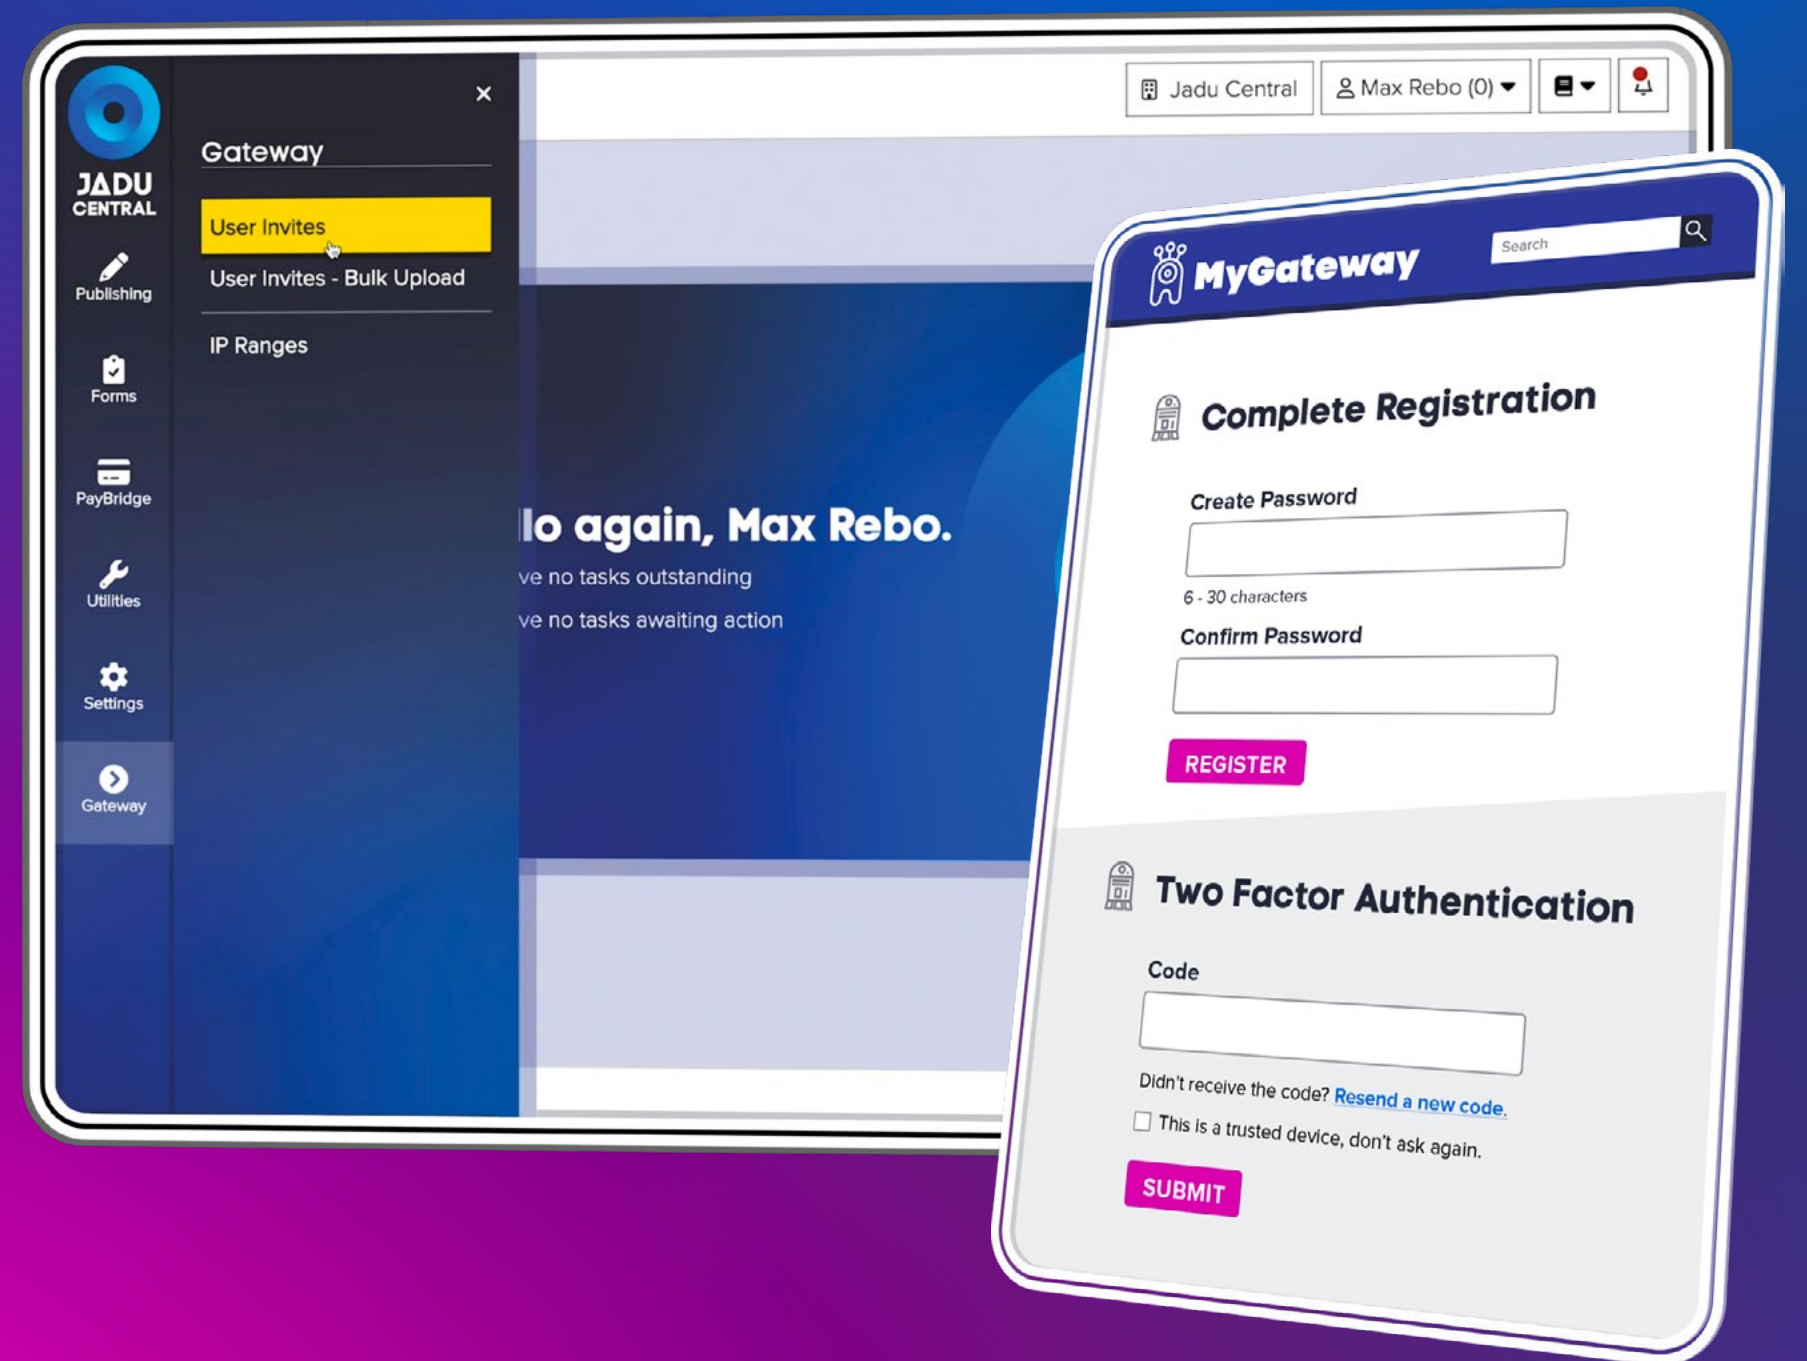

Such as; HR Policies e.g. Whistleblowing, reporting forms, internal communications, guidance and support, information on pay, benefits, and wellbeing initiatives.

You can publish content to your corporate intranet and make it available to all of your employees wherever they are, even if they don't

have a corporate email address.

This helps to remove the legal risk of not providing employees with access to important documentation and supports transparency and digital inclusion at work.

The solution can be implemented as a standalone website or to complement an existing intranet.

BENEFITS TO YOU

- » Provides secure access to important information and forms, regardless of whether employees have a corporate email address or access to a workstation inside your corporate network.
- » Enables employees to access employment policy documentation from anywhere, at any time, with Two Factor Authentication for added security.
- » No one is left behind, frontline employees can access important information by signing in with their personal email addresses securely.
- » Eliminates the frustration and legal issues associated with not having access to important employment policy documentation.
- » Ensures your organisation is digitally inclusive and transparent, by ensuring all employees can access information no matter their role or location.
- » Supports dispersed, remote, or hybrid teams to encourage inclusivity, productivity and efficiencies within teams.
- » Provide barrier-free access to Council members and trade union representatives making requests from trusted locations and networks.

KEY FEATURES

Here are just some of our features, [request more info or a demo](#) to discover more and their benefits:

- » Intranet pages are exposed to the web, but the content is behind a login screen for added security.
- » Access and authentication are via a valid username and password, and 2FA.
- » Employees accessing the intranet through the organisation's network are not challenged with a login.
- » External members (such as Councillors in the local government context) and trade union representatives accessing from a given IP address are not challenged with a login.
- » IP addresses that can access the intranet without authenticating are managed within the Jadu Central Control Center.
- » Invitations to access the intranet are managed in the Jadu Central Control Center and can either be created as a one-off or using a bulk upload tool.
- » If not actioned within a reasonable time period, invitations expire.
- » Users can also be temporarily disabled to prevent access while suspended or on sabbatical.

Jadu Central Gateway ensures that front-line colleagues have access to the same information at the same time and in the same way as IT-enabled colleagues and is a significant step in our digital and accessibility ambitions.

The platform reinforces our commitments to engagement and empowerment of colleagues, and to continue transforming services.

- Janice Novak, Operational Excellence Lead, City of Edinburgh
