& NDT Inspection
Specialists

 **inspectahire**[™]
The industrial inspection specialists

At Inspectahire, we specialise in providing cutting-edge industrial inspection services and technologies, catering to a diverse range of industries including civil engineering, oil & gas, shipping, and energy.

Our commitment extends beyond mere inspection – we offer comprehensive support to companies in these sectors. With a team of highly trained technicians, an inventory of the latest equipment available for hire and purchase, and equipment maintenance services, we ensure your continuity of operation by providing access to latest innovations in inspection technology.

Unmatched Knowledge and Expertise

Founded in 1981, we have unparalleled knowledge and experience.

We are adept at navigating hard-to reach and challenging environments swiftly, safely and cost effectively.

What we do

Infrastructure Inspection

Ensure the structural integrity of your assets with our advanced inspection techniques and technologies.

Underwater Inspection

Monitor the integrity of submerged equipment and structures with our range of ROV's and complementary technologies.

Customised Inspection Plans

No two projects are alike. We craft personalised inspection plans, aligning with your unique requirements and industry regulations. Our teams have undertaken many research and development projects both internally and with academic institutions.

Equipment Sales

We are the appointed distributors for a wide array of specialised remote visual inspection technologies and non-destructive testing equipment, all conveniently available for direct purchase. We offer comprehensive support, encompassing sales, service, and lifetime warranty assistance. Additionally, as the approved training provider for these products, we ensure you receive expert training and support throughout the product's lifetime.

Industrial Equipment Inspection

Maximise efficiency and minimise downtime with our thorough equipment evaluations.

Aerial Inspection

Gain a new perspective with our range of indoor and outdoor drones equipped with the latest imaging technology.

Equipment Hire

Access the inspection technology you need without the burden of investing in the capital costs associated with owning an occasionally used instrument. We hire the latest specialised remote visual inspection technology and Non-Destructive Testing equipment to thousands of customers each year on every continent.

Equipment Maintenance

It is essential that the expensive inspection equipment you own is regularly serviced and calibrated to ensure both its longevity and accuracy. Our highly skilled team of technicians are able to provide manufacturer approved servicing and repair for a wide range of equipment ensuring it's always ready for use.

Inspection Services

Almost every inspection represents a unique challenge. By leveraging our in-house design and solution capabilities, we can create complete custom inspection plans for every situation. Our commitment is to provide clients with the most effective solution to answer their challenges, whether it's a straightforward hire or a complete inspection service provided by our in-house technicians.

Our skilled field engineers are able to carry out the full inspections using single or multiple technology sets on site and provide the results back to you in real time.

Training

Inspectahire holds approval as Teledyne FLIR training providers specifically for Optical Gas Imaging (OGI). Utilising the cutting-edge technology from Teledyne FLIR, we deliver high-quality OGI training using the FLIR GF Camera systems. Our instructors, all ITC approved, bring a minimum of 10 years of experience in the Offshore/Oil & Gas environment. They have extensively employed the GF Camera systems for baseline surveys and LDAR programs, ensuring comprehensive and practical training for our clients.

Our Customers

Oil & Gas

With a three-decade tenure in the Oil & Gas industry, spanning both the challenging North Sea and global arenas, we have cultivated a robust expertise within this dynamic sector. Inspection technology and Non-Destructive

Testing equipment to thousands of customers each year on every continent.

Power Generation

Frequently, the configuration or dimensions of your asset may prompt considerations on the most effective approach to guarantee its safety, corrosion resistance, efficient

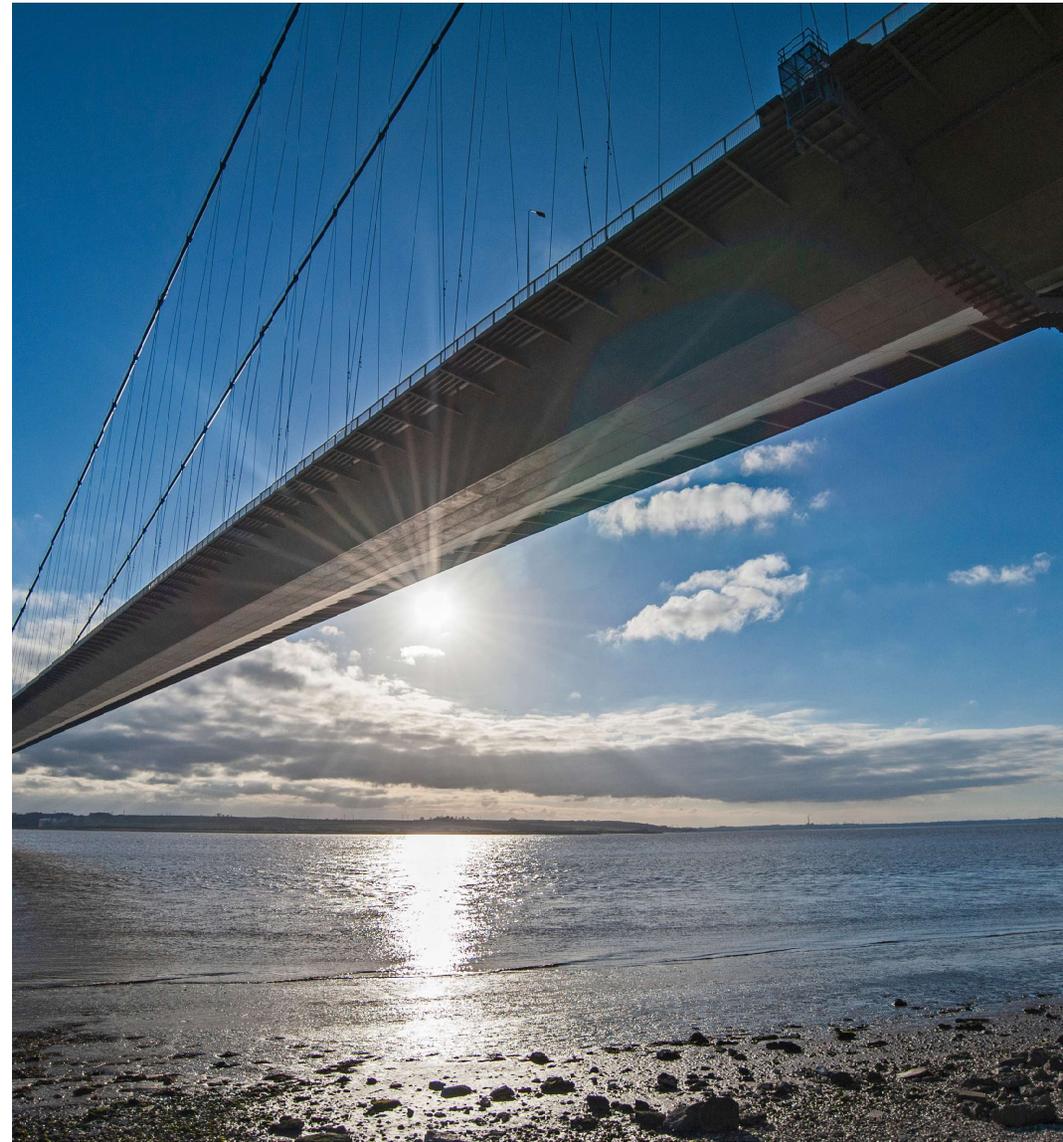

operation, or prevention of leaks. We support power generation Companies across the globe with the inspection of critical equipment and infrastructure.

Renewables

Ensuring the structural integrity and proper maintenance of your assets is crucial, given the wide-ranging implications.

Yet, determining the appropriate measures can be challenging due to factors such as size, shape, environment, or location. We are able to provide the most appropriate inspection and imaging solution for almost every situation.

Civil Engineering

In response to growing environmental consciousness among individuals and businesses, there is an accelerating momentum towards adopting renewable energy sources to minimise carbon footprints.

We have extensive experience in planning and deploying the appropriate inspection technologies for wind, wave and solar generation facilities.

Our Customers

Pharmaceutical

We believe prevention is better than cure! Routine inspections can detect issues proactively, ultimately saving you time and money in the long term. Furthermore, adhering to Environmental and HSE regulations is imperative for asset owners, and our technologies and services are designed to guarantee and streamline your compliance. We regularly work with Pharmaceutical Companies to provide Optical Gas Imaging, Storage Tank Surveys and Pipework Inspection services and equipment.

Food and Drink Manufacturing & Processing

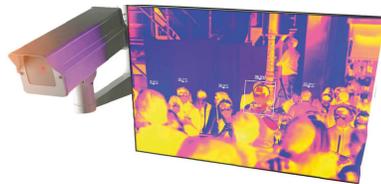

Maintaining optimal efficiency in production facilities is a core objective for all site owners. Our suite of NDE services, including Thermography and Gas Emission Surveys, enables continuous monitoring of plants even during operation. When planned outages occur, our teams are poised to provide assistance for more in-depth and invasive investigations.

We have also built an enviable reputation in the distilling industry providing CCTV surveys of feed and drainage pipework, through IRIS and Eddy Current surveys of heat exchangers and condensers, PEC surveys of insulated pipework, and EMUUA Standard Tank inspections, complimented by Optical Gas imaging surveys for Ethanol leaks.

Security & Counter Terrorism

Securing critical infrastructure and facilities against malicious acts is becoming more challenging as the actors involved become more sophisticated in their techniques.

We provide the latest and most effective scanning and imaging technologies to corporations and governments around the world who need to secure their borders and facilities.
