

GlassMark

Kiely GlassMark is a coloured surface solution made from 100% recycled industrial and consumer grade glass.

With the UK's local authorities having declared a climate emergency, Kiely GlassMark provides a genuine carbon benefitting alternative to traditional, proprietary mined, aggregate based, coloured surface materials and can be provided in a range of suitable sizes.

With a 100% pantone matching service, the coloured product can be applied by hand or machine and is used in a variety of settings including hard shoulders, cycle ways, parking/ charging bays, and pedestrian crossings.

Other benefits include a brighter and longer lasting aesthetically superior finish which means remedial works will be less frequent, helping those who have tight budgets.
