On-site & laboratory construction UKAS materials testing

- Concrete & road coring
- Soil sampling & testing
- UKAS Laboratory
- Bituminous testing
- Aggregate testing
- CBR/Plate Bearing tests
- Pavement Investigations
- NDM Testing

"MSS staff go above and beyond. Tony has been outstanding in helping me provide very detailed and specific testing reports back to one of our main clients, without his help reporting would have been very difficult. Taylor always does her best to make sure all our jobs are covered even with last-minute changes to our programme with minimal fuss, and Mike has always been there to provide expert advice on various projects."
