SENTIO[®] GHOST

MAKING 'INVISIBLE' PLATES VISIBLE

Sentio Ghost is the intelligent, discreet and highly effective solution designed to combat the use of 'ghost plates' and their associated criminal activities

**Monitors up to 2 lanes,
system can be
deployed in front or
rear facing orientation**

**Sentio Ghost combines advanced
imaging and analysis capabilities
to deliver superior evidential
image capture and smart
detection of elusive licence plates**

**Automatic Number Plate
Recognition (ANPR) with
ghost plate anomaly
flagging**

SENTIO CAMERAS, ANY SCENARIO, ANYWHERE, ANY TIME

MAKING 'INVISIBLE' PLATES VISIBLE

FEATURES

- Uses advanced UK developed Ghost Plate detection software
- Simultaneous capture of two image types per event
- Totally non-invasive
- Monitors up to 2 lanes, and can be deployed in front or rear facing orientation
- Weighs less than 12Kg
- 9Mp images
- Colour images for day and night
- IR compatible at night
- ANPR with ghost plate anomaly flagging
- Flexibility in offence case storage medium (either cloud-based or local server)
- Offence viewing via RS720 platform or RSGPV (Ghost Plate Validator)

INSTALLATION

- Can be installed on existing street furniture, thereby avoiding large civil engineering costs
- Flexibility in deployment - can be trailer mounted or set in temporary concrete block foundation and powered by hydrogen fuel cell or other means
- Can be installed between 25m and 40m from detection point

SENTIO CAMERAS, ANY SCENARIO, ANYWHERE, ANY TIME

EXAMPLES OF CAMERA DETECTION

The screenshot displays the Redspeed processing interface. The top navigation bar includes 'Processing ID: 1', 'Owner: system.admin', and 'Status: Processing'. The main content area is divided into several sections: 'Ghost Plate' (Site: Hartlebury Rd, Kidderminster; Lane: 1; Speed: N/A; Date: 01 Sept 2025; Time: 16:50), 'Quick reject' (OTHER (NO COMMENT)), 'Vehicle details' (VNU: GH05TZZ, VRM not required), and 'Accept or reject' (Outcome: Case accepted, SUBMIT CASE button). Below these are tabs for 'ATTACHMENTS', 'SECONDARY CHECK', 'ADDITIONAL INFORMATION', and 'CASE ACTIVITY'. The main image area shows two side-by-side camera captures of a white van. The left image is labeled 'SENTIO GHOST TECHNOLOGY' and shows the license plate 'GH05 TZZ' clearly. The right image is labeled 'STANDARD ANPR TECHNOLOGY' and shows the license plate as 'ZZ'. Red lines connect the license plates in the images to zoomed-in views on the right. The zoomed-in views show 'GH05 TZZ' for the Sentio Ghost technology and 'ZZ' for the Standard ANPR technology. A 'Tools' panel on the right includes 'RESET', 'BRIGHTNESS', 'CONTRAST', 'SATURATION', and 'INVERT COLOURS' sliders.

Powered by our RS720 platform, Sentio Ghost images expose drivers who attempt to conceal all or part of their number plates. This intelligence uncovers high-risk drivers who persistently want to evade capture and plays a vital role in bringing them to account through education or enforcement.

This screenshot is identical to the one above, showing the Redspeed processing interface. It compares 'SENTIO GHOST TECHNOLOGY' (which correctly identifies the license plate as 'GH05 TZZ') with 'STANDARD ANPR TECHNOLOGY' (which only identifies the last two characters as 'ZZ'). The interface includes the same navigation bar, processing details, and zoomed-in license plate views with red connecting lines. The 'Tools' panel on the right remains the same.
