

# Forensic Testing Service (FTS)

**FTS was set up with the sole purpose of providing specialist toxicology and DNA services, including drug and alcohol analysis and expert interpretation, for Family Law and Child Care Proceedings.**

**Mobile clinics**

Our discreet mobile clinics offer a clean, safe, and controlled setting for sample collection. With our robust collection process and a thorough, traceable chain of evidence, we ensure reliability and peace of mind from the outset.

**Toxicology lab**

Our forensic lab is accredited to ISO/IEC 17025:2017 and Lab 51 (toxicology lab) standards. FTS routinely analyses up to 42 compounds including novel psychoactive substances (NPS), with an additional 37 available on request, and bespoke turnaround times to meet your needs.

**Expert evidence**

FTS provides full forensic expert opinion evidence and interpretation based on all available facts of the case, not just lab test results. Our expert reports disclose all findings and consider these alongside all other information in the case.

# Why Choose **FTS**?

At FTS, we specialise in providing reliable drug, alcohol, and DNA testing services tailored for Family Law and Child Care Proceedings. Our commitment to accuracy, efficiency, and expert guidance sets us apart.

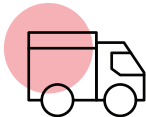

## **Expert-Led Evidence & Support**

- Comprehensive expert opinion reports, with a detailed client questionnaire completed prior to sample collection—a full copy of which is issued for your records.
- Direct access to Forensic Toxicologists for specialist advice.
- Assistance with Practice Direction 25B and 25C.

## **Personalised Service & Complete Case Support**

- Personalised customer service to meet all your requirements.
- End-to-end case management from initial enquiry to final invoicing.
- Dedicated case managers for expert advice and post-report queries.
- Automated updates and online portal access for full transparency.
- Training available for legal professionals.
- Bespoke pricing options, including LAA-compliant rates.

## **Fast & Secure Sample Collection**

- Full information provided to clients before collection for peace of mind.
- Flexible collection from any location—whether offices, residential premises, or via our discreet mobile clinics.
- Samples collected by trained Forensic Investigation Officers with strict chain of custody.
- Empathetic approach to client needs throughout.

## **Uncompromising Quality & Innovation**

- Industry-leading drug testing panels with the most extensive ISO/IEC 17025:2017 accreditation scope.
- Toxicology reports that meet the highest legal standards, satisfying Court of Appeal rulings (Re H & Re D).
- Continuous research & development to stay at the forefront of testing technology.
