

Transforming the care sector through connecting live supply and demand data

Significant issues persist in the care sector. Something has to change.

Lack of visibility of, and access to, current care capacity

No present and historical demand data to inform commissioning

13% of NHS hospital beds occupied by delayed discharges - costing £270-570M per yr

Un-used care capacity (13%) impacting patient flow and provider sustainability

Pairly.com is a revolutionary platform designed to bridge the gap between those seeking care and care providers.

Using innovative technology, Pairly delivers a real time supply and demand data management platform, facilitating meaningful care connections for seekers and providers (home care, micro, care homes)

With Pairly, find, manage and pay for all care requirements efficiently and effectively - using real-time capacity data.

- ✓ Address the discharge challenge
- ✓ Prevent admission by quickly accessing community support
- ✓ Find care quickly & efficiency (individuals & brokerage team)
- ✓ Save costs and drive efficiencies
- ✓ Support communities effectively

Key Benefits for Local Authorities & NHS Trusts

Effective care sourcing & management

- ✓ Real time visibility of capacity
- ✓ Real-time matching of supply and demand to quickly and efficiently find care options
- ✓ Data driven insights - view ALL providers and their availability in real time
- ✓ Use data for market shaping (based on demand and capacity) including privately funded and funded care

Improve overall efficiencies

- ✓ Automate the care search - save time, resources and cost – all whilst delivering exceptional service
- ✓ Efficient discharge process supporting patient flow
- ✓ Re-allocate staff time to more complex customer requirements

Proactive longer term social care and health management

- ✓ Actively manage your market and oversee all care connections
- ✓ Make strategic commissioning decisions based on actual capacity and demand data
- ✓ Effectively plan for the future, identify trends quickly.

Somerset County council have trialled Pairly:

- ✓ Cost efficiencies – Min £70 saved per client request (excl. wider system costs)
- ✓ The team on average spend 5-20 hours on the phone, around 60% of phone calls aren't fruitful.
- ✓ With Pairly, available care capacity can be identified in under 3 minutes.

We invite you to explore how Pairly Portal can support their mission to deliver high-quality, efficient, and responsive health and social care for all.
