DELIVERING GREAT SURFACES

OUR PURPOSE

DELIVERING GREAT SURFACES SINCE 1994

For more than three decades, **MEON® UK** has helped organisations across **the UK and Ireland create safer, more durable and better-performing surfaces.**

We work with **asset owners, specifiers, contractors** and **operational teams** to solve practical challenges across **line marking, surface repair & specialist surfacing applications.**

Our approach combines technical knowledge, proven systems, equipment, training and practical support to help customers make the right decisions from specification through to delivery.

As an independent company, we work back from the challenge facing the customer rather than starting with a product.

The objective is simple: understand what the surface needs to achieve, identify the right solution and support its successful delivery.

OUR VALUES

1. RESOURCE

Finding the knowledge, products and expertise needed to solve the challenge.

2. ACTION

Turning recommendations into practical outcomes, within an appropriate time frame.

3. PASSION

Continually looking for better ways to improve surfaces and industry knowledge.

4. TRUST

Building long-term relationships through knowledge, quality and technical support.

COMPLETE SURFACE SOLUTIONS

MEON® UK delivers more than products. We bring together the systems, equipment, knowledge and support needed to help surfaces perform in demanding real-world environments.

Line Marking & Surface Coatings

High-performance marking and coating systems for highways, transport, commercial, industrial and operational environments.

Surface Repair & Reinstatement

Practical systems for asphalt, concrete, cracks, potholes, ironwork and wider surface maintenance requirements.

Machines & Equipment

Equipment for surface preparation, drying and application, supported by hire, servicing and technical guidance.

Training & Technical Support

Practical and technical training designed to improve application quality, consistency, safety and confidence.

Meon Experience & Project Support

Support from the initial challenge and specification through to implementation, installation and ongoing technical guidance.

FROM CHALLENGE TO GREAT SURFACE

The right surface solution starts with understanding what the environment needs to achieve. Our approach is built around four clear stages.

1 UNDERSTAND

We assess the environment, substrate, traffic, specification, performance requirements and project constraints before recommending a solution.

2 ENGINEER

We identify the most suitable systems, equipment and application approach around the needs of the project, not the other way around.

3 DELIVER

We support implementation with products, equipment, demonstrations, training and practical expertise to help achieve the required result.

4 SUPPORT

Our support can continue beyond installation through technical advice, servicing, training and ongoing guidance focused on long-term performance.

SPECIALIST SOLUTIONS FROM MEON®

Alongside our core **MEON® UK** offer, we provide specialist solutions through focused brands developed for specific applications and operating environments.

Different challenges. Specialist solutions. One commitment to better outcomes.

ADVANCED PAINT MARKING & PERFORMANCE MACHINES

Spectrum provides specialist cold-applied line marking and surface coating solutions developed around better-quality, longer-lasting applications.

The range has a variety of MMA, water, and solvent based products for internal and external markings. Combined with surface preparation, surface drying and surface application machines and training.

ROAD REPAIR & IRONWORK REINSTATEMENT

MAGMA® provides specialist cold-applied road repair and reinstatement solutions developed around better-quality, longer-lasting repairs.

The range supports pothole repair, crack repair, full ironwork system reinstatement, overbanding, concrete repair and other on and off highway maintenance requirements.

ADVANCED UV SURFACE TECHNOLOGY

SpectrumUV® uses advanced UV-curing technology to reduce curing times and minimise operational disruption.

Designed for demanding environments, the system supports faster return to service while providing durable, high-visibility surface markings and specialist machines for application.

BUILT FOR REAL-WORLD ENVIRONMENTS

Our experience spans sectors where safety, durability, performance and minimal disruption are critical. We support projects ranging from major transport infrastructure to busy industrial and commercial sites.

HIGHWAYS & MUNICIPALITIES

Line marking, road repair, reinstatement and specialist surface systems for highways, local authorities, utilities and maintenance contractors.

AIRPORTS & TRANSPORT

High-performance marking, equipment and surface solutions for environments where clarity, compliance and operational continuity matter.

WAREHOUSING & LOGISTICS

Surface markings, workplace safety, traffic management and asset protection for fast-moving operational sites.

MANUFACTURING & INDUSTRIAL

Durable surface and safety solutions designed around people, vehicles, machinery and demanding production environments.

FACILITIES, CAR PARKS & PUBLIC REALM

Practical marking, repair and surface solutions for commercial properties, public spaces, access routes, car parks and managed estates.

WHY WORK WITH MEON?

Better surfaces come from better decisions. **MEON® UK** combines decades of industry experience with technical expertise and practical support to help customers move from challenge to successful delivery.

MORE THAN THREE DECADES OF EXPERIENCE

Established in 1994, our knowledge has been built through years of working with real applications, real environments and real surface challenges.

TECHNICAL EXPERTISE

We help customers understand the options, select appropriate systems and approach projects with greater confidence.

COMPLETE SUPPORT

Products, equipment, hire, servicing, training, demonstrations and project support can be brought together around the needs of each application.

PRACTICAL TRAINING

Our **Training Academy** supports both theory and practical development, helping improve safety, consistency and application standards.

INDEPENDENT, CUSTOMER-FOCUSED APPROACH

We work back from the challenge facing the asset owner, specifier or applicator, with the aim of finding the right solution for the required outcome.

From need to delivery, our focus remains the same: Deliver Great Surfaces.
