

Reach the
impossible

We find solutions to impossible access problems

Infinite Access specialises in delivering safe, innovative and efficient solutions for our clients' most complex challenges across all environments, from offshore installations to stadiums.

Our team consists of highly trained, multi-skilled professionals who thrive on finding the right approach, removing the need to rely on multiple contracting partners for one job.

"One of the few
rope access
teams we
trust without
hesitation."

Jay Jermy, JDP

Industrial Rope Access

We deliver safe, flexible rope access solutions for projects of any size, in locations often considered unreachable.

By removing the need for scaffolding or heavy access equipment, we keep disruption low, allowing projects to progress with minimal delay.

Why choose us?

- Highly adaptable
- Minimal downtime or disruption
- Cost and time-efficient
- Environmentally-friendly
- Safety-first

Engineering Solutions

Our mechanical and engineering services combine specialist trades with the speed and adaptability of rope access.

From welders to electricians and NDT inspectors, our IRATA-certified technicians deliver complete work scopes safely, even in challenging environments, reducing downtime, disruption and overall project costs.

Our Capabilities

- Fully coded welders
- Mechanical overhauls & pipefitting
- Electrical works
- Demolition & structural works
- Non-Destructive Examination (NDE)
- LEEA inspection
- Insulators
- Paint inspection

Rigging & Lifting Operations

Our rigging and lifting teams deliver safe, reliable solutions for complex lifting operations in any setting.

From planning through to execution, our experienced specialists can manage everything from installations and removals and relocations of machinery to steelwork, glazing and specialist items.

Our Expertise

- NVQ L3 Rigging Supervisors
- OPITO S3 Rigging & Lifting
- ECITB Appointed Persons (TAP01)
- CPCS A61 & A62
- CPCS A40 Slinger/Signallers

Work At Height Consultancy

With falls from height still the leading cause of workplace fatalities in the UK, we help organisations work confidently and in line with regulations.

Using our extensive practical experience, we advise on suitable methods and equipment to protect people, assets and operations at every stage.

Our Capabilities

- PPE selection and inspection
- Designing safe systems
- Identifying correct methods and equipment
- Producing procedural documentation
- Workplace training

Confined Space Entry

Our fully certified, multi-skilled teams apply advanced entry methods, constant monitoring and strict safety controls to meet the highest standards in high-risk confined spaces.

We deliver compliant solutions for inspection, maintenance, cleaning and repairs in all environments, including tanks, silos, tunnels and pipelines.

Why choose us?

- Highly experienced, City & Guilds-trained team
- Safety and compliance at the forefront
- Support tailored to your circumstances
- Minimal disruption to operations
- Solutions for every environment

Non-Destructive Testing

Using specialist rope access methods, our IRATA-certified technicians carry out accurate Non-Destructive Testing in hard-to-reach locations without scaffolding, cranes or downtime.

NDT assesses material integrity without damage, saving time and cost while ensuring ongoing safety and regulatory compliance.

Our Capabilities

- Ultrasonic Testing (UT)
- Magnetic Particle Inspection (MPI)
- Dye Penetrant Inspection (DPI)
- Eddy Current Testing (ECT)
- Visual Inspection (VI)

Lifting Gear Inspection

Our LEEA-accredited technicians use specialist rope access to reach challenging onshore and offshore locations safely and efficiently.

All inspections comply with LOLER and PUWER regulations, ensuring all lifting operations meet legal, safety, and performance standards.

Our Capabilities

- Lifting gear inspection
- Load testing
- Crane inspection
- Wire rope inspection

Fall Protection

Working alongside architects, designers and facilities teams, IRATA-trained technicians deliver safe, accurate installations across varied structures, providing confidence in work at height systems.

We install, test and certify EN795 Type A anchors, meeting UK requirements including Work at Height Regulations 2005, BS 7883:2019 and BS 8610:2017.

Our Capabilities

- Full risk assessment
- Structural evaluation
- Certified installation
- STAHT digital pull-testing equipment
- Documentation & certification
- EN795A-certified fall protection anchors

Building Maintenance

We provide high-quality building maintenance and repair through rope access, reaching difficult areas safely.

Our specialist team delivers precise, compliant work, from routine maintenance to major restoration, protecting safety, performance and appearance while keeping disruption to a minimum.

Our Capabilities

- Cladding installation & repair
- Painting & industrial coatings
- Masonry repairs & repointing
- Leak investigation
- Glazing maintenance & replacement
- Signage & banner installation
- Roof repairs & rainwater goods maintenance
- Building condition surveys
- Concrete repairs & liquid coating systems

V-Deck™ Access Platform

V-Deck™ is an innovative, under-deck access system with a proven record of reducing time and costs.

It replaces traditional suspended scaffolding for all under-deck work on bridges, jetties, and ports, offering a safe and reliable platform for working at height, tailored to almost any structure and site conditions.

Benefits of a V-Deck™ Access System

- Reduced project time and costs - up to 88%
- Flexible design
- Preserve equipment and structural integrity
- Withstands high wind and water forces
- Increased safety features
- Can be installed in confined spaces

Testimonials

Don't just take our word for it, here's what our clients have to say!

" A dependable team with the right skills for complex access work. You'll struggle to find a better provider of rope access support."

Zeff Marlowe, QuikDeck

" Very professional, helpful and will do all they can to solve problems in high-risk confined space environments. They are now our first choice for Confined Space and Rope Access Solutions."

J.McNally, Sime Darby Oils

" The level of work and professionalism of your team has been outstanding. I would recommend Infinite Access to anyone looking for similar work to be completed."

G.Dean, Saputo

" Your knowledge around the task has been invaluable and helped ensure that works were completed within budget and timescale."

J.Estcourt, Equans
