GMA GARNET GROUP

RS BLASTECH

COMPREHENSIVE ABRASIVE AND EQUIPMENT SOLUTION

FOR ALL YOUR SURFACE PREPARATION REQUIREMENTS.

GMA GARNET GROUP

GMA GARNET ABRASIVES

GMA Garnet™ is a high-performance abrasive that is highly effective in removing thick and resistant coatings as well as medium to heavy rust. GMA Garnet™ is approved by major paint manufacturers, preferred by major **oil companies, shipyards and international fabricators.**

GMA NewSteel™

Faster than other garnets or staroulite, **GMA NewSteel** provides superior surface cleanliness, a uniform profile, and greater coating adhesion, extending your coating life.

GMA PremiumBlast™

Recognised as the most popular, industry standard garnet abrasive, **GMA PremiumBlast** is an engineered blend of alluvial garnet, designed for fast and efficient removal of resilient coatings.

GMA ToughBlast™

GMA ToughBlast is an engineered blend garnet abrasive designed to power through heavy industrial coatings. Achieve high blast rates and your required profile on heavily rusted or pitted surfaces, tank lining maintenance, 2 or 3 coat systems, maintenance on pipes, pressure vessels, and offshore platforms.

RS BLASTECH - EQUIPMENT SOLUTIONS

RS Blastech is a **leading supplier of blasting & coating equipment solutions,** helping clients improve safety, efficiency, productivity whilst reducing project constraints and timescales.
Utilising good equipment and technology, specifying the right equipment setup, is the foundation of smart and profitable working.

INNOVATE

We apply modern blasting innovations to improve surface preparation and deliver better results

OPTIMISE

Our solutions reduce blast time, abrasive consumption, and improve overall job efficiency.

SAFEGUARD

We prioritise operator safety and reliable equipment to protect teams and maximise performance.

BENEFITS OF OUR TAILORED BLASTING SOLUTIONS

HIGHER BLASTING PRODUCTIVITY

By combining GMA Garnet™ abrasives with advanced blasting equipment and optimised settings, you can achieve **up to 30% improvement** in blasting productivity and operational efficiency.

LOWER BLASTING AND DISPOSAL COSTS

Operating at peak blasting performance helps **reduce abrasive consumption**, minimise disposal volumes, resulting in reduced overall blasting costs.

SAFER – LOW DUST LEVELS

GMA Garnet™ is a natural mineral **abrasive free from toxic contaminants** and heavy metals.
It generates low dust levels during blasting and does not release harmful particles into the working environment, helping improve operator safety and reduce environmental impact on site.

IMPROVED PROJECT TURNAROUND

Our tailored blasting solutions help **reduce downtime** and keep projects on schedule, enabling you to complete work faster and move efficiently onto the next project.

SURFACE QUALITY

Our specialised technical knowledge and high-quality garnet abrasives help achieve cleaner surface profiles that meet industry surface preparation standards with minimal embedment. This supports improved **coating adhesion, coating performance,** and long-term asset protection.

TECHNICAL SUPPORT

Our combined technical expertise enables us to support you with both abrasive and blasting equipment challenges.
Our team works closely with you to deliver practical solutions that improve blasting performance and operational reliability.

SAFER, CLEANER, FASTER

BLASTING & COATING SOLUTIONS

We offer a comprehensive range of industrial abrasives and abrasive blasting equipment to support all your surface preparation requirements.

Our tailored solutions help improve blasting productivity, reduce project timelines, and lower overall blasting costs.

We would love to support your next requirement on **Blasting & Coating Equipment, GMA Garnet™ Abrasive, Consumables or Spares.**
