

The Pontoon & Dock Company

YOUR ONE STOP SOLUTION

EZDOCK

PONTOON HIRE

MARINE EQUIPMENT SOLUTIONS FOR THE CONSTRUCTION, EVENTS, COMMERCIAL AND LEISURE INDUSTRIES.

ABOUT US

The Pontoon & Dock Company Ltd is a family run company offering a wealth of experience and knowledge in the design and installation of marine equipment across the U.K. The company was formed in 2009, starting out with a small combi van, a green trailer, about ten sections of pontoon and a website. Since then we have grown into a large family and one of the industries most respected suppliers.

P&D stands out as the premier choice for water-based projects, thanks to our unparalleled expertise, commitment to quality, and dedication to client satisfaction. With over a decade of excellence behind us and avision for the future, we continue to set the standard for innovation and reliability in the industry.

We have developed strong relationships with suppliers all over the world and are able to offer the best marine products available on the market. We have carefully selected the highest quality pontoon systems, which allows us to offer a variety of turn-key marine solutions to suit our customers required needs.

When it comes to unlocking the full potential of your marina or waterside project, trust The Pontoon and Dock Company Ltd to deliver results that exceed your expectations.

Your One Stop Solution

WHY P&D?

We understand that every project is different, which is why we offer a variety of different pontoon systems and marine accessories to suit your specific project. We have a large array of accessories and fittings that can be attached to the pontoons. Our design team can also fabricate bespoke fittings and structures to cater to any specialised requirements.

Every enquiry will be dealt with in the same way, so no job is too big or too small. We will always provide you with quick and informative responses within the quoting process, whilst also providing detailed 3D design layouts, so you can clearly see what we will be providing, and how it will look on the waterways.

Once the fine details have been completed, we will get to work at providing the pontoon that is right for you. We love working to the highest standards, which is why we work with many industry leading companies across the UK who share the same passion.

We have a long standing reputation in the UK - working with a variety of clients including those in rail, water, geotechnical, infrastructure and highways, as well as a range of commercial, leisure and private clients.

ONE STOP SOLUTION

We deliver engineered pontoon hire solutions across a broad range of commercial, industrial, and event-based sectors. Our services support marine construction and maintenance works, safety and work boat operations, and complex temporary installations for events, festivals, and sporting venues.

With proven experience across infrastructure, waterways, and public environments, we provide stable, compliant, and site-specific access solutions designed to perform in demanding conditions.

Our extensive equipment fleet includes modular pontoon systems such as EZ Dock, P&D3, LinkFlote, and NATO pontoons, allowing us to configure bespoke layouts to suit varying load requirements, water conditions, and operational needs.

In addition, we supply buoys and booms for navigation, safety, and environmental control, alongside marine training to ensure safe operation and regulatory compliance. By combining high-quality equipment with technical expertise and responsive support, we deliver reliable, end-to-end water access solutions you can depend on.

COMMERCIAL PONTOON HIRE

Our commercial pontoon fleet is engineered to provide high-performance floating platforms for complex construction and marine operations. Designed with modular load-bearing systems, our pontoons deliver excellent stability, freeboard control, and buoyancy, making them suitable for plant flotation, heavy-duty work access, temporary working platforms, and the safe operation of floating cranes, piling rigs, excavators, and articulated booms.

Pontoon configurations can be designed to accommodate variable loadings, dynamic plant movement, and site-specific water conditions, including tidal variation, flow rates, and restricted access environments. We offer multiple pontoon systems equipped with engineered connectors, adjustable mooring arrangements, handrails, edge protection, access ramps, and scaffold interfaces to ensure full integration with temporary works designs.

All installations are planned and delivered in accordance with project-specific method statements and risk assessments, with experienced, CSCS-accredited operatives holding DEFRA-approved water safety training supporting each deployment. Our pontoons are widely used across rail, highways, water, geotechnical, and infrastructure projects for inspection, construction, maintenance, and remediation works.

In addition, we supply buoys and booms for navigation management, exclusion zones, debris control, and environmental protection.

SAFETY & WORK BOAT HIRE

We provide professional safety and work boat hire services, delivering reliable on-water support for a wide range of construction, infrastructure, and marine operations. Our versatile fleet is capable of operating across rivers, canals, lakes, reservoirs, and coastal environments, allowing us to support projects in varied and often challenging conditions. All vessels are maintained to the highest operational standards and are equipped to assist with construction works, inspection and maintenance activities, environmental operations, filming support, and emergency response requirements.

Our work boats are configured to support personnel transfer, plant assistance, towing operations, exclusion zone management, and emergency recovery, ensuring safe and efficient on-water operations at all times. Each deployment is supported by highly experienced crews holding a comprehensive range of recognised qualifications, including DEFRA Module 1, commercially endorsed RYA Powerboat Level 2, RYA First Aid at Work, Rescue 3 Rescue Boat Operator, Swift Water Rescue Technician, and Swift Water and Flood Rescue Boat Operator certifications.

This high level of competency ensures our teams are fully prepared to manage dynamic site conditions, fast-flowing water, and emergency situations in accordance with industry best practice. By choosing our safety and work boat services, clients benefit from improved site safety, and dependable, professional support throughout the duration of their project.

OUR PONTOON EQUIPMENT

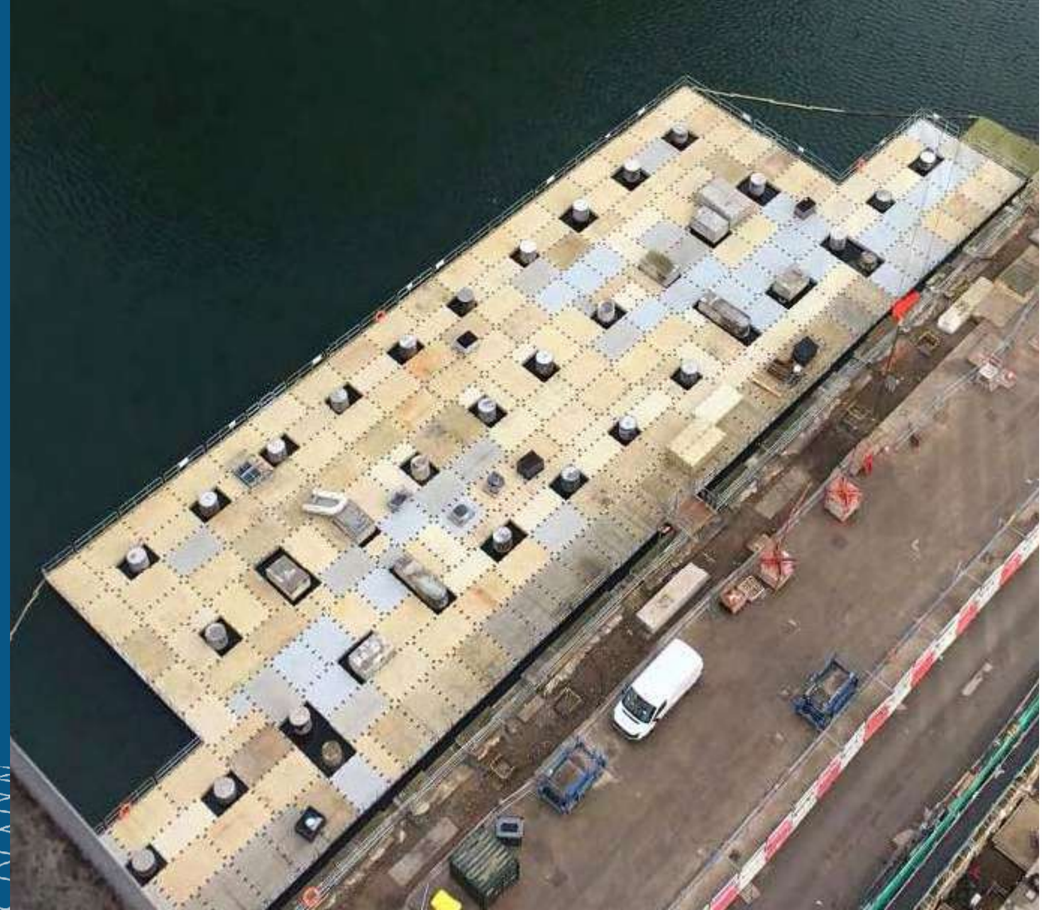

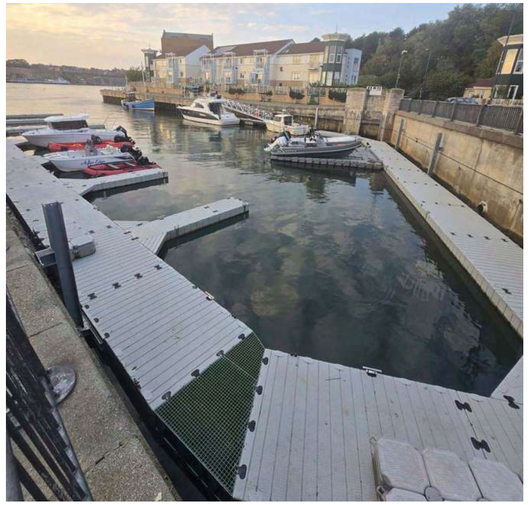

EZ DOCK PONTOON

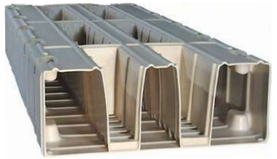

With over 3,000 m² in our fleet, EZ Dock is our preferred pontoon system, offering a modular floating dock solution renowned for strength, stability, and versatility. Its sections are rotationally moulded from low-density polyethylene (LLDPE), producing thick-walled, durable flotation chambers free from foam or internal fillers. The modular design is fully customisable, allowing sections of varying sizes to be connected in almost any configuration.

Flexible recycled-rubber couplers join each section, enabling independent movement while maintaining a strong, unified structure. This allows the dock to absorb stress from waves or movement while remaining stable underfoot. EZ Dock is suitable for commercial or residential applications, performing equally well as marinas, swim platforms, work platforms, floating walkways, or temporary installations

Key features and specifications:
• Section weight: 175 kg.
• Dimensions: 3 m x 2 m x 38 cm (Other sizes available).
• Flotation capacity: 1,800 kg per section.
• Material & Construction: Rotationally moulded LLDPE, UV resistant, slip-resistant, seamless.
• Design: Unique pylon (chamber) structure for strength and stability.
• Customisation: Handrails, brackets, gangways, ramps, moorings, outboard brackets, plus many more.

P&D³ PONTOON

P&D³'s cube system of modular floating pontoons offers versatility, ease of use, and a cost-effective solution for a wide range of on-water applications. This modular design allows for a bespoke floating dock tailored to your exact needs, whether for walkways, swim platforms, jetties, floating work platforms, drive-on docks, floating bars, bridges, or stages.

This budget-friendly pontoon option is ideal for both leisure and light-use installations. P&D³ pontoons are safe, with a patterned top surface and no sharp corners to reduce the risk of slips. Each float has a tensile strength of over 1,950 kg (tested at 50 mm/min); and are fully recyclable - made from 100% HDPE.

Key Features & Specifications:
- Material: High-Density Polyethylene (HDPE).
- Size: 500 mm x 500 mm x 400 mm.
- Weight: 7 kg.
- Load capacity: Over 350 kg/m².
- Manufacture: Blow molding.
- Modular design: Single pin joins up to 4 modules, flexible layouts.
- Customisation: Handrails, brackets, gangways, ramps, moorings, outboard brackets, plus many more.

LINKFLOTE PONTOON

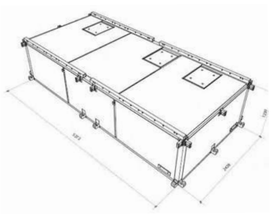

LinkFlote pontoons are heavy-duty modular floating platforms designed for commercial and industrial use. Fully welded structural steel frames with reinforced deck plates and marine-grade coatings provide exceptional strength and durability. Three watertight compartments enhance stability, safety, and allow for ballasting. The modular design allows units to be connected to create platforms of any size, from working pontoons to large barges, floating bridges, access ways, or temporary landing stages.

Units are road transportable and rapidly assembled on site. Pontoon and Dock can advise on stability, buoyancy, and load arrangements for specific requirements.

Key Features & Specifications:
• Construction: Fully welded structural steel frame with reinforced deck.
• Length: 5,272 mm | Width: 2,428 mm | Depth: 1,230 mm.
• Weight: Approx. 4,000 kg.
• Internal compartments: 3 watertight chambers.
• Uniformly distributed load (UDL): 95 kN with 225 mm freeboard.
• Maximum permissible deck load: 20 kN/m².
• Modular: Connect units to create platforms of any size.
• Customisation: Handrails, bollards, timber decking, winches, and other fixtures.

NATO PONTOON

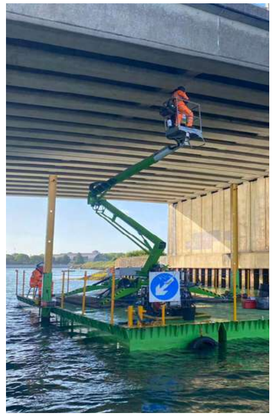

NATO pontoons are heavy-duty, modular steel platforms engineered for marine, construction, and civil-engineering projects. Fully road-transportable, they offer exceptional strength, durability, and stability under heavy loads, and can be assembled on site into bespoke layouts of virtually any size.

They are ideal for industrial applications such as dredging platforms, crane barges, cargo handling, piling platforms, temporary bridges, and landing stages. Their modular adaptability, high load-bearing capacity, and ease of transport make them a reliable solution for demanding commercial and industrial marine projects.

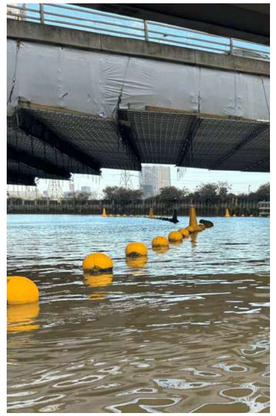

Technical Specifications & Features:
- Weight per unit: 1,660 kg.
- Load capacity per unit: 2,650 kg.
- Dimensions: 4,200 x 2,100 x 750 mm.
- Construction: High-tensile steel for maximum strength and durability.
- Modular design: Units can be combined into bespoke platforms of any size.
- Optional accessories: Spud legs, gangways, swim-end sections, handrails, lighting.

BUOYS & BOOMS

Our buoys and booms provide engineered solutions for coastlines and waterways, combining high visibility, durability, and reliability to enhance safety, navigation, and environmental protection. Our range of demarcation buoys, available up to 700 mm in diameter, can be customised with mould-in graphics and fitted with self-contained solar-powered LED marine lanterns visible up to six nautical miles, ensuring clear marking of swimming, boating, and leisure zones in diverse marine environments.

The Bolina Ball Safety Booms feature spherical floats that sit high on the water and remain visible even in strong currents, effectively discouraging small to medium marine traffic in designated areas. Their open design allows swimmers and other water users to see through the barrier, maintaining situational awareness while providing a reliable physical boundary.

Together, our buoys and booms deliver long-lasting, highly visible protection for marine spaces, clearly delineating hazard zones, leisure areas, or navigation routes. Bright colours, reflective materials, and optional lighting ensure visibility both day and night, helping to reduce accidents and improve overall waterway safety.

MARINE TRAINING

Marine training from Pontoon & Dock provides practical, industry-relevant skills for personnel working in marine construction, commercial marine operations, and waterfront environments. Delivered by experienced instructors, our programmes develop confidence, operational understanding, and safe working practices on and around the water. Courses cover real-world scenarios including vessel movement, working safely on and around water, boarding procedures, emergency response, and the correct use of marine access equipment.

To make training directly relevant to your operations, we can incorporate our own pontoon systems and other specialist equipment, allowing courses to be fully customised around the exact type of work your teams perform. Participants gain hands on experience using scenarios drawn directly from live projects, ensuring familiarity with operation, inspection, and safety techniques under realistic and often demanding conditions.

Training is suitable for site teams, commercial marine operators, contractors, and organisations looking to upskill their workforce, reduce operational risk, and meet industry expectations for competence. Upon completion, teams are better prepared for day-to-day marine tasks, operating safely, efficiently, and confidently across a variety of watercourses and complex marine environments, with practical experience directly applicable to their projects.

WATER & FLOOD AWARENESS

1 Day

Location - Various (UK)

Learn essential water rescue theory, hazards, flood dynamics, and rescue techniques, including throw-line, and equipment use.

LIFEJACKET COMPETENT USER

1 Day

Location - Various (UK)

Learn assessment of hazards, lifejacket types, fitting, maintenance, rescue skills, risk assessment and safety systems for working near water.

SAFE WORKING NEAR WATER

1 Day

Location - Various (UK)

For those working near water: learn PPE, risk assessment, rescue planning & techniques, water hazards and more.

SAFE WORKING IN WATER

2 Days

Location - Various (UK)

Practical two-day, in-water training covering PPE, rescue techniques (talk, reach, throw), entrapments, casualty management & communications.

WORK BOAT

2 Days

Location - Various (UK)

Practical course for beginners: learn inland boat handling on flat or slow-moving water, rescue boat operations, tow, anchor, & crew roles.

RESCUE BOAT

2 Days

Location - Menai Strait

Learn boat handling, rescue techniques, PPE, risk assessment, casualty recovery, towing, and communication in a practical course.

WATER-BASED TRAINING COURSES

In partnership with Amanzi Safety & Rescue, Pontoon & Dock delivers a comprehensive range of industry-leading marine training courses. Expert-led and practical, these courses combine hands-on learning with essential industry knowledge, equipping participants with the skills, confidence, and understanding needed to operate safely and effectively across diverse marine environments.

OUR PARTNERSHIP PROMISE

By combining specialist knowledge of the marine industry with practical training expertise, we deliver courses that go far beyond the classroom. Each programme is designed to provide realistic, hands-on experience, giving your teams the operational awareness and confidence required to meet realworld marine challenges safely and effectively.

WHY CHOOSE US?

Our training programmes offer industry-recognised qualifications delivered by highly skilled, accredited trainers with extensive practical experience. Built around real-world scenarios, each course provides hands-on learning tailored to your organisation. Flexible delivery is available across the UK, ensuring programmes meet the specific needs of your workforce while enhancing competence, confidence, and safety in demanding marine environments.
