Gaist

CLEARER PICTURE.
SHARPER PRIORITIES.
STRONGER REPORTING.

Manage your road network with total confidence

Scottish local authorities face growing pressure to report accurately, spend wisely, and prove it. Gaist gives you the accurate, defensible survey data you need to manage roads with confidence — delivered through a single, cost-effective collection.

No more juggling multiple surveys. No more second-guessing your data. Seamless, precise insight that supports every maintenance decision you make.

Proven support for Scottish authorities already working with Gaist

Gaist

Four core services. One efficient survey run.

Carriageway Condition

Comprehensive assessment across 38 distinct damage types, giving you a reliable picture of network condition for reporting and asset management planning alike.

Footway Condition

Detailed footway surveys covering 20 damage types, helping you prioritise pedestrian safety and maintenance spend with confidence.

Asset Identification

60+ attributes captured across 11 asset classes, so you have an accurate, complete inventory of your network assets and their condition — all from one collection.

Scheme Identification

Our bespoke local street prioritisation model turns raw condition data into tailored, actionable scheme recommendations, helping you direct funding where it's needed most.

Why Scottish Authorities choose Gaist

- **Seamless integration** with your existing Asset Management Systems and GIS tools, minimising operational burden
- **Single-survey efficiency** — all four services captured in one cost-effective collection
- **Audit-ready, defensible data** that supports confident, evidence-based decision-making
- **Proven support** for Scottish authorities already working with Gaist

Trusted by Scottish Local Authorities

"The detail, accuracy and versatility of the Gaist data is proving to be transformative for Glasgow Council!"

GLASGOW CITY COUNCIL

"We would highly recommend Gaist, both for the quality of their services and their excellent customer service!"

CITY OF EDINBURGH COUNCIL

"Since the introduction of Gaist, we're making smarter choices to keep Stirling's roads safer and resilient for everyone who lives, works, and travels here."
